PREFACE

This is the impact assessment report of CSR projects undertaken by Mangalore Refinery and Petrochemicals Limited, (MRPL) during the financial year 2022-2023, across all locations in India.

The assessment report in brief presents the company CSR policy, budget allocations and the aspects of thrust areas as well. The impact assessment report has various chapters on approach and methodology adopted by Crux Management Services P Ltd, followed by analysis of key components, analysis and results, and recommendations and suggestions.

Crux team of subject matter experts along with project head have carried the impact assessment evaluation and results evaluated herewith are derived from quantitative and qualitative data collected and analyzed across all projects and perspectives of all stakeholders involved in the process is enumerated.

The suggestions and recommendations are specific to the thematic areas in general which may be adopted as per suitability in the future endeavors.

ACKNOWLEDGEMENT

This Impact Assessment Report is prepared with considerable consultation and engagement with **Mr. K. Nagaraja Rao, Senior Manager CSR, MRPL**. The impact assessment team also interacted with beneficiaries of various projects across all locations in India.

This assessment exercise was made possible with the support of numerous individuals who readily offered their assistance for the successful completion of this project. We extend our gratitude to the entire MRPL team at project sites for providing valuable insights and support throughout the evaluation process.

We are also thankful to all stakeholders for dedicating their valuable time and sharing inputs that made this assessment insightful.

Ms. Hema Jain
CEO, Crux Management Services P Ltd

PSU	Public Sector Unit
DPE	Department of Public Enterprises
NGO	Non-Governmental Organization
BPL	Below Poverty Line
MoU	Memorandum of Understanding
SDG	Sustainable Development Goals

CHAPTER 1: INTRODUCTION

Corporate Social Responsibility (CSR) represents a business philosophy that extends beyond profit generation, emphasizing the ethical and socially responsible conduct of corporations. The genesis for the CSR act implemented in India since 2013. The underlying philosophy of CSR is rooted in the belief that businesses should not only pursue financial success but also contribute positively to the well-being of society and the environment.

The cornerstone of CSR are engagement and well-being of all stakeholders while pursuing profit goals.

Organizations worldwide have embraced the fact that stakeholder management is a fundamental requirement for sustained and meaningful growth. Recognizing that businesses impact a wide range of stakeholders, including employees, customers, communities, and the environment, CSR philosophy emphasizes engaging with and addressing the needs of these diverse groups.

UN sustainable goals have a strong bearing on business practices and have nudged all organizations to adopt sustainable business practices. CSR promotes sustainable business practices that consider the long-term impact of operations on the environment and society. This includes efforts to reduce carbon footprints, conserve resources, and promote environmental conservation.

CSR can be defined as the alignment of business operations with social values. CSR consists of integrating the interests of stakeholders, all those affected by the company's conduct, into the company's business policies and actions. CSR focuses on the social environment and the financial or economic success of a company. CSR is concerned with treating the stakeholders of the firm ethically or in a responsible manner. Ethically or responsible means treating stakeholders in a manner deemed acceptable in civilized society. Social includes economic responsibility. Stakeholders exist both within a firm and outside. The wider aim of social responsibility is to create higher and higher standards of living, while preserving the profitability of the corporation, for people within and outside the corporation.

Triple Bottom Line is also implicit since the third part of the triple is the environment, and we have to consider the environment to be a stakeholder of the company. Nevertheless, many prefer the term corporate responsibility

As it is observed that CSR funding is majorly a social investment. CSR philosophy emphasizes social investment as a strategic choice, recognizing that investing in community development, education, healthcare, and social welfare not only benefits society but also contributes to the long-term success and reputation of the business.

While the landscape of CSR funding has evolved and expanded, the growth of CSR has been notable in recent years, driven by several factors:

- **Globalization:** As businesses operate on a more global scale, there is increased awareness of the interconnectedness of economic, social, and environmental issues. Companies recognize the need to address global challenges through responsible business practices.
- **Regulatory Pressures:** Many countries have implemented or are considering regulations that mandate or encourage CSR activities. Compliance with these regulations has become a factor in corporate decision-making.
- **Investor Influence:** Investors are increasingly considering environmental, social, and governance (ESG) factors in their investment decisions. Companies with strong CSR practices are often viewed more favorably by socially responsible investors.
- **Consumer Expectations:** Consumers are becoming more conscious of the social and environmental impact of their purchases. Businesses that align with consumer values and demonstrate responsible practices are better positioned for success.
- **Technology and Transparency:** Advancements in technology have increased transparency, making it easier for consumers and stakeholders to access information about a company's practices. This transparency puts pressure on businesses to operate responsibly.

In conclusion, CSR funding reflects a philosophy that recognizes the broader responsibilities of businesses in society. Driven by a desire for positive social impact, risk mitigation, and strategic growth, CSR has evolved into a key component of corporate strategy in the contemporary business landscape. The continued growth of CSR is expected as businesses respond to the changing expectations of consumers, investors, and the global community.

INTRODUCTION TO CSR IMPACT ASSESSMENT

Corporate Social Responsibility (CSR) refers to the ethical practices and contributions of businesses toward societal well-being and environmental sustainability. CSR impact assessment is a systematic approach to evaluate the outcomes of CSR initiatives, enabling organizations to measure their effectiveness, improve transparency, and refine their strategies for better societal impact.

Through these assessments, businesses can align their efforts with stakeholder expectations and global development goals. This process helps identify successes, address challenges, and ensure that initiatives align with both community needs and organizational objectives.

IMPORTANCE OF CSR IMPACT ASSESSMENT

- **Effectiveness Measurement:** Organizations can determine if their CSR activities are meeting intended objectives and delivering meaningful change.
- **Stakeholder Engagement:** Involving stakeholders ensures diverse perspectives are considered, enhancing the relevance of CSR initiatives.
- **Continuous Improvement:** Regular assessments provide insights into successes and areas for improvement, fostering long-term development.
- **Alignment with Global Standards:** Impact assessments facilitate alignment with frameworks like the United Nations Sustainable Development Goals (SDGs), ensuring global relevance.
- **Building Reputation:** Transparent reporting fosters trust and credibility among stakeholders, reinforcing the organization's commitment to responsible practices.

REESI MODEL

The REESI Model (Relevance, Efficiency, Effectiveness, Sustainability, and Impact) provides a comprehensive framework for assessing CSR initiatives. Each component plays a vital role in evaluating the overall impact and value of CSR efforts.

- **Relevance**

- **Definition:** Relevance assesses how well CSR initiatives align with community needs, stakeholder expectations, and organizational goals.
 - **Key Focus:** Identifying specific issues or needs addressed by the CSR activities. Ensuring initiatives resonate with stakeholders and the broader community.
 - **Importance:** Ensuring relevance helps organizations focus their efforts where they can make the most significant impact.

- **Efficiency**

- **Definition:** Efficiency evaluates how well resources (time, money, personnel) are utilized in implementing CSR initiatives.
 - **Key Focus:** Assessing cost-effectiveness and resource allocation, analyzing whether the input generates sufficient outputs.
 - **Importance:** Improving efficiency ensures that organizations maximize their CSR investments, enabling more significant benefits with available resources.

- **Effectiveness**

- **Definition:** Effectiveness measures whether CSR initiatives achieve their intended goals and outcomes.
 - **Key Focus:** Setting clear, measurable objectives for each initiative and monitoring results against these objectives.
 - **Importance:** Understanding effectiveness allows organizations to identify successful strategies and make necessary adjustments for future initiatives.

- **Sustainability**

- **Definition:** Sustainability examines the long-term viability of CSR initiatives and their potential for ongoing impact.
 - **Key Focus:** Evaluating whether projects are designed for lasting benefits and assessing the potential for continued funding and support.
 - **Importance:** Ensuring sustainability maximizes the long-term impact of CSR efforts, allowing organizations to contribute meaningfully over time.

- **Impact**
 - **Definition:** Impact measures the tangible and intangible outcomes of CSR initiatives on society, the economy, and the environment.
 - **Key Focus:** Identifying and measuring social, economic, and environmental impacts.
- **Communicating the results to stakeholders transparently**
 - **Importance:** Understanding impact helps organizations articulate the value of their CSR activities, building credibility and trust with stakeholders.

Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs) are a set of 17 global objectives established by the United Nations in 2015. They aim to address urgent global challenges, including poverty, inequality, climate change, and sustainable development, with a target to be achieved by 2030.

Overview of the SDGs

- No Poverty
- Zero Hunger
- Good Health and Well-Being
- Quality Education
- Gender Equality
- Clean Water and Sanitation
- Affordable and Clean Energy
- Decent Work and Economic Growth
- Industry, Innovation, and Infrastructure
- Reduced Inequality
- Sustainable Cities and Communities
- Responsible Consumption and Production
- Climate Action
- Life Below Water
- Life on Land
- Peace, Justice, and Strong Institutions
- Partnerships for the Goals

Importance of the SDGs in CSR

- **Global Relevance:** The SDGs provide a framework for businesses to address critical global issues and guide their CSR efforts.
- **Enhanced Accountability:** Aligning with the SDGs enables companies to track their contributions to global goals, fostering greater accountability.
- **Collaboration Opportunities:** Engaging with the SDGs opens avenues for partnerships with governments, NGOs, and other organizations.
- **Long-Term Vision:** The SDGs encourage a focus on sustainable development rather than short-term gains in CSR strategies.
- **Improved Impact Measurement:** Aligning initiatives with the SDGs enables organizations to effectively measure and communicate their social and environmental impacts.

Alignment of CSR Activities with the SDGs

Organizations can align their CSR initiatives with specific SDGs by:

1. **Identifying Relevant Goals:** Analyzing which SDGs resonate with the company's mission and values.
2. **Setting Measurable Targets:** Establishing clear, quantifiable targets that contribute to the chosen SDGs.
3. **Implementing Programs:** Designing initiatives that address specific needs related to selected SDGs.
4. **Monitoring Progress:** Regularly measuring and reporting on progress toward achieving SDG-related targets.

CSR Act in India

The Companies Act, 2013 was a significant legislative move in India that formalized CSR practices. Key features include:

- **Applicability:** The CSR provisions apply to companies meeting specific financial criteria: net worth of ₹500 crore or more, annual turnover of ₹1,000 crore or more, or net profit of ₹5 crore or more during any financial year.
- **Mandatory Spend:** These companies must allocate at least 2% of their average net profits from the previous three financial years to CSR activities, focusing on areas specified in Schedule VII of the Act.
- **Reporting Requirements:** Companies are required to disclose their CSR activities in their annual reports, detailing the initiatives undertaken and the funds allocated.

- **Board Responsibility:** The CSR committee of the board is responsible for formulating and recommending CSR policies, ensuring compliance with the CSR provisions.
- **Focus on Impact:** The Act encourages companies to measure the impact of their CSR initiatives and disclose this information transparently, fostering accountability.

Conclusion

CSR impact assessment is vital for understanding the effectiveness and outcomes of corporate social initiatives. The REESI Model provides a structured approach to evaluate relevance, efficiency, effectiveness, sustainability, and impact, ensuring comprehensive analysis and improvement.

The SDGs offer a global framework for aligning CSR activities with pressing societal challenges. The CSR Act in India formalizes these practices, promoting accountability and encouraging businesses to invest meaningfully in societal development.

Together, these elements foster responsible business practices that drive positive change in communities and the environment.

Why We Need CSR?

Today's heightened interest in the proper role of business in society has been promoted by increased sensitivity to ethical issues. Government regulations regarding environmental and social issues have increased. Investors and fund managers are now making decisions based on social sustainability as well as pure economics.

Consumers are more conscious of the social performance of companies from which they purchase goods and services. These forces push firms to operate in economically, socially, and environmentally sustainable ways. CSR initiatives such as spending on communities, funding scholarships, and encouraging volunteer work foster goodwill, which indirectly increases revenue.

The Department of Public Enterprises (DPE) under the Ministry of Heavy Industries & Public Enterprises introduced CSR Guidelines in March 2010 for Central Public Sector Enterprises (CPSEs). These guidelines redefined CSR, shifting the focus from charity and philanthropy to active community participation. Recent developments emphasize thorough research and planning for CSR initiatives, ensuring that programs are aligned with societal needs and sustainable outcomes. This evolving approach reflects CPSEs' growing responsibility toward the environment, people, and societal progress.

DPE Guidelines for CSR

India's Companies Act 2013 introduced new provisions that transformed Indian corporate business. A key addition was Corporate Social Responsibility (CSR), based on the ideology of give and take. Companies utilize resources from society—raw materials, human resources, etc.—and return value through CSR activities.

Key Features:

1. **Definition:** CSR encompasses projects or programs related to activities specified in Schedule VII of the Act or undertaken by the Board per the CSR policy.
2. **Applicability:** The Act applies to companies meeting financial thresholds for net worth, turnover, or net profit, mandating 2% of net profits over three years for CSR.
3. **Flexibility:** Companies can select CSR engagements that align with their policy and societal needs.
4. **Accountability:** CSR committees are responsible for formulating and recommending policies, ensuring compliance, and reporting activities in annual disclosures.

Significance of CSR Guidelines

These guidelines emphasize research-based interventions, encouraging partnerships with communities, employees, and organizations. They underline CSR as a strategic initiative rather than an act of charity. Programs must focus on measurable, impactful outcomes that align with broader development goals.

New Approach to CSR

The shift from philanthropy to participative CSR reflects a deeper understanding of societal needs. Companies are expected to:

- Research community challenges and address them effectively.
- Partner with stakeholders for inclusive development.
- Adopt sustainability-focused practices that ensure long-term benefits.

This approach fosters accountability and ensures CSR efforts contribute meaningfully to community and environmental well-being.

CRUX Research Initiatives

Crux Management Services P Ltd has a clear mandate and vision to provide comprehensive services in the CSR space. The organization undertakes various activities, including capacity building, mindset transformation, empowerment of women and children, health awareness campaigns, and preventive measures.

Crux partners with public and private sector organizations to deliver impactful CSR solutions. Their services include conducting baseline surveys, CSR planning, CSR audits, and impact assessments. These initiatives are designed to ensure meaningful community development and sustainable outcomes.

Mangalore Refinery and Petrochemicals Limited (MRPL)

Mangalore Refinery and Petrochemicals Limited (MRPL) is a Category 1 Miniratna Central Public Sector Enterprise (CPSE) under the Ministry of Petroleum & Natural Gas. MRPL operates a state-of-the-art 15.0 MMTPA refinery located in Mangaluru, Karnataka, offering versatile designs for processing diverse crude oils and delivering high-quality petroleum products.

MRPL's refinery produces a wide range of products, including:

- Naphtha
- LPG
- Motor Spirit
- High-Speed Diesel
- Kerosene
- Aviation Turbine Fuel
- Sulphur, Xylene, Bitumen, Pet Coke, and Polypropylene

The facility also includes a 440 KTA Novolen gas-phase Polypropylene Plant, which produces a complete range of homopolymer grades.

Marketing and Infrastructure

MRPL operates an Aromatic Complex in the Mangalore Special Economic Zone (MSEZ), producing Para Xylene and Benzene. The company has infrastructure assets, including two captive jetties, a single-point mooring facility, and rail wagon loading silos for Pet Coke.

MRPL also manages depots in Kasargod (Kerala), Hindupur (Andhra Pradesh), and Hosur (Tamil Nadu) to strengthen its marketing and distribution network. The company has a 50:50 joint venture with Shell Gas B.V. called Shell MRPL Aviation Fuels and Services Limited (SMA), which markets aviation turbine fuel (ATF) to domestic and international airlines. SMA sources ATF from MRPL's refinery complex and supplies it to various airports, including Bengaluru, Goa, Hyderabad, Chennai, and Mangalore.

MRPL's commitment to innovation and excellence has made it a leader in the hydrocarbon downstream sector, setting benchmarks in quality and operational efficiency.

MRPL CSR Policy

Preamble

Mangalore Refinery & Petrochemicals Limited (MRPL) is a Miniratna Schedule A CPSE and a subsidiary of Oil & Natural Gas Corporation Limited (ONGC). Under the CSR brand name "Samrakshan," MRPL has consistently delivered initiatives promoting sustainable and equitable development. The CSR policy is aligned with the Companies Act, 2013, CSR Policy Rules, 2014, and Department of Public Enterprises (DPE) guidelines.

Objectives of the CSR Policy

- **Strengthened Commitment:** Foster commitment at all levels to operate in an economically, socially, and environmentally sustainable manner.
- **Community Welfare:** Undertake programs that enhance the quality of life and economic well-being of local communities, especially focusing on weaker sections.
- **Positive Image:** Generate goodwill for MRPL through its CSR initiatives and reinforce its image as a socially responsible corporate entity.

Focus Areas of CSR

- **Shiksha Samrakshan:**
 - Activities promoting education, particularly in Anganwadi centers, government, and aided schools.
 - Infrastructure support for classrooms, toilets, science labs, and sports facilities.
 - Skill development and vocational training for unemployed youth and underprivileged groups.
- **Arogya Samrakshan:**
 - Providing primary healthcare services in rural areas.
 - Organizing medical camps and health awareness campaigns.
 - Offering infrastructural support to government hospitals.

- **Bahujana Samrakshan:**
 - Infrastructure support for community halls near operational areas.
 - Women empowerment projects, including girl child development and gender-sensitive initiatives.
 - Programs for physically and mentally challenged individuals.
 - Disaster preparedness and capacity-building activities.
- **Prakriti Samrakshan:**
 - Support for clean drinking water and sanitation projects in rural areas.
 - Groundwater recharge and water management initiatives.
 - Environmental awareness programs in schools and villages.
- **Sanskriti Samrakshan:**
 - Preservation of local historical monuments and cultural heritage sites.
 - Promotion of artisans, craftspeople, musicians, and other traditional art forms.

Geographical Spread

- Allocation of funds will be in the ratio of 60% in local area, 30% in other parts of Karnataka and 10% in other States in India. Any variation to the above is to be brought to the notice of the CSR/SD Committee.
- Company can take up those districts in Karnataka on priority in which it has operations such as retail outlets, depots, terminals and other establishment to be considered as local area.
- Area within some suitable radius around which the operations exist can also be Considered as local area

CHAPTER 2: METHODOLOGY

Research Design

A research design is a plan, structure and strategy of investigation so conceived as to obtain answers to research questions or problems. The plan is the complete scheme or program of the research. It includes an outline of what the investigator will do from writing the hypotheses and their operational implications to the final analysis of data.

Descriptive study designs can help you show whether your program is operating as planned, provide you with feedback about the services you offer, determine whether your program is producing the types of outputs and outcomes you want, and help clarify program processes, goals and objectives. This is an ideal design for an evaluation study where the context is known to the researcher and the research questions need further description to evaluate the program.

Thus, a Descriptive study design was used with Quantitative method to collect information from the beneficiaries and Qualitative method to gain insights in the workings of the implementing partners and MRPL officials. The quantitative descriptive design is concerned with describing the characteristics of a particular group, with description of certain facts concerning that group.

Quantitative Method was used as is normally done in a Descriptive study design. This helped best to establish the incidence, extent and magnitude of the program. There was an attempt to seek information about the program to evaluate its planning, implementation and outcomes. There was no attempt to theorize the data to explain the phenomena. Findings are generalized based on the response of the sample.

Research Questions

The questions are a guiding beacon for a research study and the reason to find answers. These questions further help to define the objectives of the study.

1. What were the objectives of the program?
2. Were the objectives in line with the needs assessed in the baseline survey?
3. What were the intended outcomes?
4. Have the outcomes been met in the implementation?
5. What are the benefits to the target population?
6. What is the extent of effectiveness of implementation of the program?
7. The possible areas of corrections/ improvement

The analysis and design followed the basic essence of midterm impact assessment on the following aspects

Relevance

- Did the overall goal match needs of the project area?
- Did the project's baseline data correctly address needs of the area?

Efficiency

- What outputs were achieved and whether they were according to the plan? Was the implementation schedule as planned?
- Was the project cost within planned limit? Was the fund utilization prudent?

Effectiveness & Uniqueness

- Did the outputs help achieve the goal? Did the project have any unique feature?
- Comparing the inputs to the extent of goals achieved, can project implementation be considered to be effective?
- Can the project be replicated?

Impact

- What were the various tangible and intangible?
- Positive and negative impacts (Socio-economic, Environment, Policy, Technology, Awareness) on different stakeholders of the project?

Sustainability

- Would the impacts created by the project sustain?
- Considering the present course of project, is the project sustainable?
- If not, what modifications and corrections need to be done with project execution methodology?

Research Objectives

1. To assess if project objectives were in line with the desired output
2. To evaluate if benefits reached the target population
3. To assess the effectiveness of the program in terms of the changes

Data collection

Data collection is a vital part of research to bring the facts and validate them. The present study was conducted for multiple projects across different geographies and thematic areas CSR programs so there were separate methods and tools used to collect information from different stakeholders of all the programs.

Tools of the Study:

1. Questionnaire for beneficiaries of project
2. Interview Schedule with MRPL officials
3. Interview Schedule with Implementing partners of each project

Tools for Data Collection

Objectives	Sources	Tools
To assess if project objectives were in line with the needs of baseline survey	• MRPL • Implementing agency	• Secondary Data like Project Proposal, MoU with partners • Interview Schedule with MRPL • Interview Schedule with Implementing agency
To evaluate if benefits reached the target population	• Beneficiaries • Site visit (for infrastructure)	• Questionnaires for beneficiaries • Observation notes of researcher
To assess the effectiveness of the program in terms of the changes	• Beneficiaries • Implementing agency • MRPL	• Questionnaires for beneficiaries • Interview Schedule with MRPL • Interview Schedule with Implementing agency • Observation notes of researcher

Sources of Data

The research team focused and collected only primary data from the field. They had interviews with the beneficiaries and got their views to understand the impact of the program. To get a more holistic view, they interviewed the implementing agencies to understand the implementation, strengths and challenges. Questionnaires consisting of majorly close-ended questions focused on the information and experiences of the beneficiaries of various programs services were prepared respectively. Interview schedule for the officials of implementing agencies was prepared which comprised of open ended questions.

Sampling criteria

Sampling is simply stated as selecting a portion of the population, in the research area, which will be a representation of the whole population. The usual goal in sampling is to produce a representative sample (i.e., a sample that is similar to the population on all characteristics, except that it includes fewer people because it is a sample rather than the complete population). Simple random sampling was used in order to select the samples. A simple random sample is meant to be an unbiased representation of a group. It is the most basic sampling procedure to draw the sample.

Total Projects evaluated in the report

CSR Projects Completed During 2022-2023

Sl. No.	Project	Thematic Area	Location	Budget Allotted (Rs. in Lakhs)
1	Construction of Stage Building to Koti Chennaya Jodukare Kambala Samithi, Ontikatte, Moodabidri.	Sanskriti Samrakshan	Moodubidri, Dakshina Kannada Dist.	60
2	Construction of UKG & LKG School building for Government Aided, Shree Boodeshwara Swamy, English Medium School, Hassan, Karnataka	Shiksha Samrakshan	Nittur, Hassan Dist.	50
3	Construction of Building for Swadhar Graha Rehabilitation cum Vocation Skill Training Centre for Women and Girls (Prajna Counselling)	Bahujan Samrakshan	Mudipu, Dakshina Kannada	267
4	Construction of Research Centre on Cow Breeding and Products at Siddapura	Bahujan Samrakshan	Siddapura, Udupi Dist.	100

CHAPTER 3: DEMOGRAPHIC PROFILE

Demographics

- The geographical location of the projects is all neighboring rural areas of MRPL.
- All the beneficiaries are from the rural areas of Dakshina Kannada and surrounding districts of MRPL.
- The age group of beneficiaries is as young as child of 4 years to, young children, teenager adolescents and also certain projects have beneficiaries women of various age groups as well for some projects.
- The beneficiaries are from low income profile. Both males and females have accrued the benefits from all the projects.
- The beneficiaries are from all communities including the SC/ST communities, Adivasis and others.

CHAPTER 4: PROGRAMS AND THE IMPLEMENTING AGENCIES

The CSR projects of MRPL are being implemented since 2015, it is only imperative that a final assessment is made to take stock of the (i) implementation progress and key achievements; (ii) key processes instituted with respect to results indicators; (iii) key issues faced with respect to progress, scaling-up and quality; and (v) any changes/corrective measures and restructuring that would be required for accelerating implementation and scaling-up, improved project outcomes and utilization of funds.

Project Details - Thematic Areas and SDG alignment

Sl. No.	Project	Thematic Area	Thrust Areas	SDG Alignment	No. of Beneficiaries	Budget Allotted (Rs in Lakhs)	Budget Utilized as on Sep 2024 (Rs in Lakhs)
1	Construction of Stage Building to Koti Chennaya Jodukare Kambala Samithi, Ontikatte, Moodabidri	Sanskriti Samrakshan	Cultural Promotion	SDG 11: Sustainable Cities and Communities, SDG 8	5000	60	60
2	Construction of UKG & LKG School Building for Government Aided Shree Boodeshwara Swamy English Medium School, Hassan, Karnataka	Shiksha Samrakshan	Education	SDG Goal 4, SDG Goal 10	300	50	50
3	Construction of Building for SwadharGruha Rehabilitation cum Vocation Skill Training Centre for Women and Girls (Prajna Counselling)	Bahujan Samrakshan	Women Empowerment	SDG Goal 5: Gender Equality, SDG Goal 3: Good Health and Well-Being, SDG Goal 10: Reduced Inequalities	1000	267	267
4	Construction of Research Centre on Cow Breeding and Products at Siddapura, Udupi District	Bahujan Samrakshan	Rural Development and Animal Care	SDG Goal 2: Zero Hunger, SDG Goal 8, SDG Goal 12	3000	100	100

CSR Projects Funded During 2022-2023

The Project Wise Analysis is as follows:

I. Construction of Stage Building to Koti Chennaya Jodukare Kambala Samithi, Ontikatte, Moodabidri.

Project Overview:

Project Cost: ₹60.00 lakhs

Location: Moodabidri, Dakshina Kannada

Beneficiaries: Local communities, Kambala sports participants, cultural event attendees

Scope of Work: MRPL has constructed a stage, complete with civil and structural roofing works and floor tiling, to accommodate 3,000 to 5,000 people. The project is intended to support Kambala sports events and other cultural and community gatherings.

The project is evaluated using the REESI CSR model: Relevance, Effectiveness, Efficiency, Sustainability, and Impact, while aligning with the United Nations Sustainable Development Goals (SDGs).

Relevance

The construction of the stage is highly relevant to preserving and promoting local cultural heritage and sports like Kambala. These events are central to the community's identity and social cohesion in Dakshina Kannada. The facility not only supports large gatherings for cultural events but also serves as a venue for educational and social programs, aligning with.

Effectiveness

The stage has effectively provided a physical space for cultural expression, contributing to the social fabric and reducing inequalities by providing equal opportunities for all community members to engage in cultural activities. Kambala sports events, in particular, are crucial to preserving Dakshina Kannada heritage, offering a platform for local talents to participate in traditional sports and for marginalized groups to engage in community events.

Efficiency

The project was completed within the budget of ₹60.00 lakhs and was executed efficiently in terms of the physical infrastructure (stage, roofing, tiling). However, the absence of seating arrangements slightly impacts the overall functionality. This limited the scope of the project from being fully optimized for diverse uses, such as seminars or extended cultural performances.

Sustainability

The project contributes to the long-term sustainability of cultural and sporting events in the region by providing a permanent venue. The stage's design allows for diverse usages, supporting both traditional events like Kambala and modern-day gatherings. However, sustainability concerns arise regarding maintenance and the lack of a clear operational plan for upkeep and continued use without regular funding. The project aligns with SDG 11 by creating infrastructure that promotes community well-being, but more attention is required to ensure long-term viability through partnerships or local government support.

Impact on Utilization

The construction of the stage has had a significant impact on the local community.

Cultural Preservation: By providing a permanent space for Kambala sports and other local traditions, the project has empowered local communities to continue their cultural practices in a structured environment.

Community Development: The facility has become a central hub for local functions and gatherings, facilitating community bonding and cultural participation.

Economic Benefit: Events organized at the stage boost the local economy by attracting vendors, artisans, and participants.

Gaps Identified

Lack of Seating Arrangements, the stage does not include seating or basic furniture for attendees, limiting the comfort and functionality of the space. This limits the center's ability to host larger and longer events, impacting community participation and cultural events.

Absence of Maintenance and Sustainability, there is no long-term plan for the maintenance and sustainability of the stage, and thus the lack of clear operational funding or management responsibility risks the longevity of the infrastructure.

Recommendations

- Equip the stage with essential furniture such as seating arrangements for attendees and speakers to enhance functionality, may be through other funding collaboration.
- Collaborate with local authorities or event organizers. The organization can take initiative to ensure the stage has a regular maintenance plan and operational funding, ensuring long-term usability.
- Install retractable shelters or rain covers to allow for uninterrupted events during the monsoon season.

Beneficiary Interaction

Conversations with local community members revealed that the stage has become a vital part of their cultural identity. Participants in Kambala events expressed satisfaction with the construction, noting that it provides a formal space for an important traditional sport. Additionally, local event organizers emphasized that the stage is a focal point for various community activities, ranging from cultural performances to educational seminars.

However, both organizers and attendees pointed out the need for seating and protection against weather conditions as areas for improvement. These enhancements would not only increase comfort but also extend the stage's usability for different kinds of events.

Crux team discussed with the beneficiaries and various stakeholder including the managers, audience, and others, through a semi structured questionnaire.

The snapshot of findings is as follows:-

Most of the respondents were residents of Moodabidri for more than a decade and were familiar with facilities available in and around the village, and before the construction of the stage there were no facilities for Kambala sports events and local functions and this fund has provided and closed a huge gap. They opined that the facility is utilized very well and quite frequently, with a signification addition to participation from all. A good recall rate of being funded by MRPL is evident and the wish list for further support on this particular infra creation is Store room, Steel Railing, Dressing room, Lightings Wash room amongst the top 5, requirements.

Success story

Revitalizing Local Culture

The newly constructed stage for Koti Chennayya Kambalain, Moodabidre has become a vibrant center for cultural gatherings. With the capacity to host more than 3,000 attendees, the venue has revitalized local traditions, particularly the Kambala sports event, a unique buffalo race integral to Tulunadu culture. The annual Kambala festival attracted tourists from surrounding regions, boosting local businesses such as food vendors and craftspeople. This influx of visitors increased the economic activity in Moodabidre, supporting around 50 local entrepreneurs as shared by the villagers around the stage as shared by Ranjith Poojary , the manager at the mission.

Community Cohesion through Events

Mr.Dhanraj one of the participant was very happy and said -Since the completion of the stage, the Moodabidre community has seen a significant increase in social events, from religious celebrations to cultural programs. Local organizations have started utilizing the space to host educational workshops and health camps, fostering a sense of unity. The stage has transformed into a gathering place, enhancing community bonds. Residents report improved relationships and collaboration among different community groups, illustrating the role of infrastructure in social cohesion.

Increased Employment Opportunities

The construction of the stage has also created temporary employment opportunities for local laborers. During the construction phase, over 100 local workers were employed, leading to increased household incomes in the region. Mr. Vathsala Rajesh M K, aged 40, one of the respondent added that, the ongoing events have spurred demand for event-related jobs, including security, catering, and maintenance services, benefiting many families and reducing unemployment rates in the area.

Purpose and Broader Impact of the Project

The construction of the Koti Chennayya stage serves a broader purpose of supporting cultural heritage, fostering social cohesion, and promoting economic activity in this region of Dakshina Kannada. As a venue for traditional sports like Kambala, the stage plays a crucial role in preserving the unique identity of the region. Additionally, the stage provides an essential gathering space for various community events, contributing to the cultural and economic vibrancy of the area.

By aligning with SDG 11 (Sustainable Cities and Communities) and SDG 8 (Decent Work and Economic Growth), the project fosters both social and economic development.

- **SDG 11** by fostering community participation and cultural sustainability. Sustainable Cities and Communities
- **SDG 4** as an educational platform for youth to learn and connect with their traditions.
- **SDG 8** by indirectly promoting local employment and small-scale economic opportunities related to events.

The stage is a cultural investment that encourages community engagement, social inclusion, and local economic opportunities.

Conclusion

The construction of the stage for Koti Chennayya Kambalaat ,Moodabidri has delivered significant cultural and community benefits, particularly in promoting local traditions and sports. Addressing the identified gaps in seating, maintenance, and weather protection would greatly enhance the long-term sustainability and utility of the facility, ensuring its continued relevance and impact for future generations.

THE CENTRE

SPORTS, SOCIAL CULTURE ACTIVITIES AT CENTRE

II. Construction of UKG & LKG School building for Government Aided, Shree Boodeshwara Swamy English Medium School Building, Nittur Hassan, Karnataka.

Project Overview:

- **Project Cost:** ₹50.00 lakhs
- **Location:** Nittur, Hassan District
- **Beneficiaries:** Local village children and surrounding communities

Scope of Work: MRPL constructed 5 classrooms, a passage/verandah, and separate washrooms for boys and girls. The balance classrooms and portico were constructed by the school management.

The project is evaluated using the REESI CSR model: Relevance, Effectiveness, Efficiency, Sustainability, and Impact, while aligning with the United Nations Sustainable Development Goals (SDGs).

Relevance

The project aims to address the critical need for accessible quality education in Nittur and its surrounding villages. By constructing classrooms for LKG/UKG students, the project supports early childhood education, which is foundational to long-term learning. The focus on providing English medium education is particularly relevant, given the increasing demand for English proficiency to improve future job prospects and socio-economic mobility in rural areas.

Effectiveness

The construction of five classrooms, along with a verandah and washrooms, has significantly improved the infrastructure of the school, creating a conducive environment for early learning. The new facilities have also resulted in increased enrollment from local villages, as parents are more inclined to send their children to a well-equipped school. Separate washrooms for boys and girls enhance the safety and hygiene standards, encouraging a healthier learning environment.

Efficiency

The project was completed within the allocated budget of ₹50.00 lakhs, with all necessary construction work—classrooms, passage, and washrooms—delivered efficiently. The allocation of resources and construction process were well-coordinated, ensuring timely delivery of the infrastructure.

Sustainability

The school infrastructure built by MRPL is sustainable in the long run, requiring minimal maintenance. The materials used in construction are durable, ensuring that the classrooms and facilities will serve the community for many years. The inclusion of separate washrooms enhances gender sensitivity and promotes long-term health benefits for the children.

Impact on Utilization

The newly constructed classrooms have made a significant impact on the local community. By improving the infrastructure, the project has made education more accessible to young children in the region, especially for those from economically weaker backgrounds. The availability of an English medium education from an early age increases the competitiveness of these children, providing them with better opportunities in the future. The facilities have also contributed to a higher enrollment rate and reduced dropout rates, as parents feel more confident in the school's environment.

Gaps Identified:

- **Limited Teaching Aids:** There is a lack of teaching aids, such as smart boards, or other interactive tools, which are critical for improving early childhood education.
- **Community Awareness:** While the school has seen increased enrollment, some local communities are still unaware of the new infrastructure and its benefits, limiting the full potential reach of the project.

Recommendations:

- **Teaching Aids and Materials:** Introduce teaching aids such as digital boards, charts, and learning materials to make the classrooms more interactive. Investing in digital learning tools like projectors or smart boards would further improve the quality of education.
- **Recreational Facilities:** Consider building a playground or adding open spaces for physical activities. This would not only support holistic child development but also attract more parents to enroll their children in the school.
- **Outreach and Awareness:** Conduct awareness programs to ensure more parents from surrounding villages understand the benefits of sending their children to the school. This could involve community meetings, outreach drives, or partnerships with local influencers.

Beneficiary Interaction

During interactions with parents, teachers, and local leaders, the feedback on the new infrastructure has been overwhelmingly positive. Parents highlighted that the separate washrooms for boys and girls provided a safe and hygienic environment, encouraging them to send their children to school regularly. Teachers expressed the need for more resources such as furniture and teaching aids, which would help them deliver lessons more effectively. Local leaders commended MRPL's contribution to enhancing educational opportunities in the region, though they also emphasized the need for further investments in learning materials and playgrounds to fully realize the school's potential.

The snapshot of findings is as follows:-

Most of the respondents were residents of region for more than a decade and were familiar with facilities available in and around the village, and before the construction of the English medium school facility, there were none to address this very important aspect of education this fund has provided and closed a huge gap for all the children who will now start getting education in English medium from the lower grades itself. The facility is yet to be utilized for optimum levels and may need a lot of awareness for the parents to enroll their wards in the same. A good recall rate of being funded by MRPL is evident and the wish list for further support on this particular infra creation is compound wall as an immediate requirement.

Story 1: Improved Educational Access

The new classrooms constructed for the Boodeshwara School have significantly increased access to quality education in Nittur. With modern facilities, the school now attracts more students from surrounding villages. Enrollment rates for LKG and UKG classes have risen by 20% in the past year, providing local children with a strong foundation in English education. Parents are more willing to invest in their children's education, leading to a gradual improvement in overall literacy rates in the community, quoted by Mr. Devaraju , Vice President of the organization .

Story 2: Empowering Local Teachers

Mr. Lakshmanegowda BL, a teacher feel that the upgraded facilities will empower local teachers to adopt innovative teaching methods, leading to improved student performance. Teachers will feel more motivated to implement creative lesson plans in the new classrooms. The success of the English medium instruction has encouraged teachers to pursue professional development, benefiting the educational ecosystem in Nittur.

Purpose and Broader Impact of the Project

The construction of these classrooms and associated facilities serves several crucial purposes:

- **Educational Access:** By building dedicated infrastructure for LKG/UKG students, the project ensures that children in rural areas have access to early childhood education, a critical stage for cognitive and social development.
- **Community Development:** The availability of an English medium school in the region increases the prospects for children from local villages, preparing them for a more competitive future. The school's infrastructure encourages parents to invest in their children's education, thereby fostering long-term community development.
- **Socio-Economic Benefits:** With better access to quality education, children from these villages have the potential to break cycles of poverty by securing better opportunities in the future. The introduction of English medium instruction enhances their chances of accessing higher-paying jobs in urban areas.
- **Promotion of Gender Equality:** The construction of separate washrooms for boys and girls promotes gender sensitivity, ensuring that girls, in particular, have a safe and hygienic learning environment. This can contribute to reducing school dropouts among girls as they reach adolescence.

The project is aligned with SDG

- **SDG 4 (Quality Education)**, promoting inclusive and equitable quality education by providing the infrastructure for an English medium school in a rural area
- **SDG 10 (Reduced Inequalities)** The construction of five classrooms, along with a passage and washrooms, provides a secure and conducive environment for education, helping to bridge educational inequalities
- **SDG 11 (Sustainable Cities and Communities)**. The construction materials and design ensure that the infrastructure is durable, with minimal environmental impact

With strategic improvements and community engagement, this project has the potential to serve as a cornerstone for long-term educational and social development in the region, contributing to the empowerment of future generations.

Conclusion

The construction of classrooms and related facilities for the LKG/UKG English Medium School at Boodeshwara School, Nittur, has been instrumental in improving access to quality education for the local community. The project is well-aligned with the needs of the region, addressing both infrastructural gaps and educational barriers. While the school is already making a significant positive impact, addressing the identified gaps in furniture, teaching aids, and recreational facilities will further enhance its utility and sustainability.

THE CLASSROOMS

THE VERANDAH SPACES FOR FREE MOVEMENT

THE SCHOOL BUILDING

III. Construction of Building for Swadhar Graha Rehabilitation cum Vocation Skill Training Centre for Women and Girls (Prajna Counseling), Mudipu, Dakshina Kannada dist.

Project Overview

- **Project Cost:** ₹2.67 Crores
- **Location:** Mudipu, Dakshina Kannada dist.

Importance of the Project in Rural India:

The Women Rehabilitation Building at Prajna Counseling Centre aims to provide a safe haven for women facing domestic violence, mental health challenges, and social stigma in rural India. It serves as a critical resource for psychological support, vocational training, and community reintegration. The project is vital for promoting gender equality, empowering women, and fostering a supportive environment that recognizes and addresses women's issues in rural settings. In rural India, women often face a multitude of challenges stemming from deep-rooted socio-cultural norms, economic constraints, and inadequate access to resources. Issues such as domestic violence, mental health stigma, lack of educational opportunities, and limited access to vocational training are prevalent. These challenges hinder women's personal growth and contribute to a cycle of dependency and vulnerability.

The Women Rehabilitation Building at Prajna Counseling Centre plays a pivotal role in providing a safe space for women escaping domestic violence. Project recognizes the importance of mental well-being and offers counseling services that address issues such as depression, anxiety, and trauma related to abuse. By providing professional mental health services, the centre helps de-stigmatize mental health issues and encourages women to seek help, fostering a culture of openness and support. The project includes vocational training programs aimed at equipping women with skills that enhance their employability and economic independence. By learning trades such as tailoring, handicrafts, and computer skills, women can generate their own income, thus reducing their dependence on abusive partners and family members. Economic empowerment is crucial for fostering self-reliance and improving the overall quality of life for women and their families.

The project is evaluated using the REESI CSR model: Relevance, Effectiveness, Efficiency, Sustainability, and Impact, while aligning with the United Nations Sustainable Development Goals (SDGs).

Relevance

The project is highly relevant as it addresses pressing issues such as domestic violence, mental health, and social stigma against women in rural areas. The need for safe spaces and supportive services for women is underscored by community surveys that highlight high rates of domestic abuse and mental health concerns.

Efficiency

The project has utilized resources effectively, with ₹2.67 Crores being allocated to construct a facility that can serve multiple purposes, including counseling, workshops, and community gatherings. The timely execution of construction and implementation phases has maximized resource utilization, demonstrating operational efficiency.

Effectiveness

Preliminary evaluations indicate that the centre has successfully provided services to over 300 women within its first year of operation. Feedback from beneficiaries shows that 85% of women reported improved mental health and increased confidence in handling personal challenges. The effectiveness is also reflected in the successful vocational training programs that have helped women gain skills for economic independence.

Sustainability

The project incorporates sustainable practices, such as rainwater harvesting and solar energy, ensuring minimal environmental impact. Additionally, partnerships with local NGOs and government bodies are established to maintain long-term operational funding and community support, enhancing sustainability.

Impact

The centre has had a significant impact on the lives of women in Dakshina Kannada. It has not only provided immediate support but has also contributed to a cultural shift in how women's issues are perceived within the community. There is a noted increase in awareness and discussions around women's rights and mental health, with community leaders advocating for these issues.

Identified Gaps for a holistic approach to the solution

- **Outreach and Accessibility:** Limited outreach programs to include women from remote areas who are unable to travel to the centre.
- **Mental Health Resources:** Need for additional trained mental health professionals to accommodate growing demand.
- **Sustainability Funding:** Reliance on initial funding could pose risks to long-term operational sustainability.
- **Community Engagement:** Limited involvement of men and local leaders in promoting gender equality and support for women's issues.

Recommendations

- **Expand Outreach Programs:** Develop mobile units or community-based outreach initiatives to reach women in remote areas.
- **Increase Staffing:** Recruit more mental health professionals to meet the needs of all beneficiaries.
- **Diversify Funding Sources:** Explore partnerships with corporate sponsors, NGOs, and government grants to ensure financial sustainability.
- **Enhance Community Involvement:** Organize awareness programs that include men and community leaders to promote gender equality collectively

Beneficiary Interaction

Interactions with beneficiaries revealed valuable insights. Women expressed gratitude for the safe space and support, emphasizing the importance of community involvement. Regular workshops and counseling sessions have fostered a sense of belonging and empowerment. However, some beneficiaries indicated a desire for more outreach activities to be included, so was the desire by women, who are unable to visit the centre.

The snapshot of findings is as follows:-

Crux team interacted with the inhabitant of the Prajna Counseling Centre, and beneficiaries of the rehabilitation facility for a couple of months feel the space, so created is quite adequate for their vocational rehabilitation, besides stay and the recreation facility. The beneficiaries feel it is a significant step in addressing the needs of the community, particularly for women facing family-related issues.

They are looking forward to such funds that can help in providing a library facility, self-employment job facility besides sick room for the inmates.

Success Story

Title: From Vulnerability to Empowerment

Meet Julekha, a 32-year-old woman from Mudipu who, after suffering years of domestic abuse, found refuge at the Prajna Counseling Centre. Initially hesitant and fearful, she attended a workshop on self-esteem and empowerment. With the support of counselors and her peers, she gradually opened up about her experiences.

Through vocational training offered at the centre, Julekha learned tailoring, allowing her to gain financial independence. Julekha's journey from victim to empowered woman exemplifies the transformative impact of the Women Rehabilitation Building and its commitment to uplifting women in rural India.

In conclusion, The Women Rehabilitation Building at Prajna Counseling Centre has proven to be a valuable asset for the community in the region. The project has successfully addressed crucial issues faced by women, promoting empowerment and social change. While it has achieved significant outcomes, addressing identified gaps and implementing recommendations will further enhance its impact and sustainability.

Alignment with SDG Goals

The project aligns with several Sustainable Development Goals (SDGs):

- **SDG 5: Gender Equality** - By providing support to women, the project directly addresses gender disparities.
- **SDG 3: Good Health and Well-being** - It offers mental health services and promotes emotional well-being.
- **SDG 8: Decent Work and Economic Growth** - Vocational training initiatives contribute to economic empowerment for women.

In summary, the Women Rehabilitation Building at Prajna Counseling Centre is not just a physical space; it represents a beacon of hope and change for women in Dakshina Kannada and surrounding areas. By addressing critical issues related to violence, mental health, and economic empowerment, the project plays an essential role in fostering a more equitable and supportive community for women, ultimately contributing to the broader goal of sustainable development in rural India.

THE COUNSELING IN PROGRESS

**BUILDING FOR SWADHARGRAHA
REHABILITATION CENTRE**

IV. Construction of Research Centre on Cow Breeding and products at Siddapura.

Project Overview

- **Project Cost:** ₹100 lakhs
- **Location:** Siddapura, Udupi Dist.

The Gousourga Cow Breeding Centre aims to enhance the livelihoods of rural farmers in Siddapura by providing access to quality cow breeds, fostering sustainable dairy practices, and contributing to local economy growth. This project is vital in a region where agriculture and livestock rearing are central to community sustenance and economic development.

Importance of the Project in Rural India

In rural India, livestock plays a crucial role in the economy, providing not just income but also nutrition and employment. The Cow Breeding Centre is designed to improve the genetic quality of local cattle, increase milk production, and ensure better market access for farmers. This contributes to food security, poverty alleviation, and sustainable agricultural practices, aligning with the broader goals of rural development.

The Cow Breeding Centre is a transformative initiative aimed at enhancing the livelihoods of rural farmers in Siddapura, a region where agriculture and livestock play a crucial role in the local economy. With a project cost of ₹100 lakhs, this Research centre is dedicated to improving the genetic quality of local cattle, thereby increasing milk production, promoting sustainable dairy practices, and bolstering economic development within the community.

Objectives of the Project

- **Improve Livestock Quality:** The primary aim is to provide farmers with access to high-quality breeds, enhancing the overall genetic stock of cattle in the area.
- **Increase Milk Production:** By improving cattle quality, the project seeks to boost milk yields, which will directly contribute to farmers' income and food security.
- **Sustainable Dairy Practices:** Educating farmers about sustainable dairy farming practices ensures the long-term viability of livestock rearing in the region.
- **Community Empowerment:** The project focuses on building capacity among farmers, enabling them to take charge of their livelihoods and contribute to local development.

Significance of the Project

Crux team has interacted with various stakeholders and gathered that the centre has already gathered lot of traction. It has already set in process few MOU with research centers and also with University. The background work to empanel farmer organization has already begun.

- **Economic Empowerment:** Livestock is a critical source of income for rural families in Siddapura. By enhancing the quality of dairy cattle, the Cow Breeding Centre can help increase farmers' incomes, thereby alleviating poverty and improving living standards.
- **Food Security:** Milk is a vital source of nutrition, particularly in rural communities. The centre's focus on improving milk production contributes to better nutritional outcomes for families, supporting both health and well-being.
- **Skill Development:** The project provides training and workshops for farmers on modern dairy farming techniques, animal husbandry, and sustainable practices. This capacity-building effort will equip farmers with the skills needed to maximize productivity and profitability.
- **Environmental Sustainability:** By promoting sustainable farming practices, the project aims to minimize the environmental impact of dairy farming. Educating farmers about waste management and responsible resource use is essential for maintaining ecological balance in the region.
- **Community Cohesion:** The centre will serve as a hub for local farmers, fostering collaboration and knowledge sharing. This community approach encourages collective problem-solving and aid to strengthen community ties.
- **Breeding of Desi cows:** Its research and implication will have tremendous value for the old Indian traditional cow breeding practices.
- **Alignment with Government Initiatives:** The project aligns with various government initiatives aimed at enhancing rural livelihoods and agricultural productivity, thereby supporting national objectives for rural development.

Community Engagement

The successful implementation of the Cow Breeding Centre hinges on active engagement with the community. Stakeholder consultations and workshops have to be conducted to assess local needs and gather input on project design. This participatory approach will ensure that the project remains relevant and effectively addresses the challenges faced by farmers.

Future Prospects

The Cow Breeding Centre has the potential to serve as a model for similar initiatives in other rural areas. As it continues to evolve, there is scope for expanding services, such as veterinary care, feed supply, and market access initiatives. The long-term vision includes establishing a cooperative model where farmers can collectively market their products, enhancing their bargaining power and profitability.

The project is evaluated using the REESI CSR model: Relevance, Effectiveness, Efficiency, Sustainability, and Impact, while aligning with the United Nations Sustainable Development Goals (SDGs).

Relevance

The project aligns well with the needs of the local farming community, which seeks to improve cattle breeds for better productivity. Interactions highlighted a strong demand for better livestock, confirming the project's relevance.

Efficiency and Effectiveness

As on date when the Crux Team visited the site, we gathered that the plans and processes are in place to utilize the resources effectively, with a well-planned budget allocation and timely implementation.

Sustainability

It is anticipated that the breeding centre is anticipated to sustain itself through service fees and community involvement.

Impact

Positive impact on local economy and community development is definitive as per the team managing the center.

Alignment with Sustainable Development Goals (SDGs) in future

- **SDG 1: No Poverty** - By increasing farmers' incomes through improved milk production.
- **SDG 2: Zero Hunger** - Enhancing food security through sustainable dairy farming.
- **SDG 8: Decent Work and Economic Growth** - Promoting job creation and economic resilience in rural areas.
- **SDG 12: Responsible Consumption and Production** - Encouraging sustainable agricultural practices.

Recommendations

- **Training Programs:** Implement regular training workshops focusing on modern dairy farming techniques and animal husbandry.
- **Market Linkages:** Establish partnerships with local cooperatives and markets to facilitate better access for farmers.
- **Infrastructure Investment:** Advocate for improvements in local infrastructure, such as roads and cold storage, to support dairy production.
- **Enhanced Monitoring:** Develop a monitoring framework to assess project impacts and gather feedback from beneficiaries continuously.

Conclusion

The Construction of the Research Centre on Cow Breeding and products is a significant initiative that has the potential to transform the livelihoods of rural farmers in Siddapura. By improving livestock quality and empowering farmers with the necessary skills and resources, the project will contribute to economic growth, food security, and community resilience. Its success will not only benefit individual farmers but also promote broader rural development, positioning Siddapura as a leader in sustainable dairy farming in the region.

THE COW SHED THAT REHABILITATES THE LIVESTOCK

THE RESEARCH CENTRE

THE PROJECT ANALYSIS ON THE 5 PARAMETER OF CSR MODEL

Parameters considered (REESI MODEL)

- Relevance
- Efficiency
- Effectiveness & Uniqueness
- Impact
- Sustainability

Evaluations have the following characteristics:

The five valuation criteria of Relevance, Effectiveness, Efficiency, Impact and Sustainability are covered, cross-cutting issues, such as poverty, gender and environment, are taken into consideration, and the intervention logic is analyzed.

Relevance

Are we doing the right thing? How important is the relevance or significance of the intervention regarding local and national requirements and priorities?

Effectiveness

Are the objectives of the development interventions being achieved? How big is the effectiveness or impact of the project compared to the objectives planned (Comparison: result – planning)?

Efficiency

Are the objectives being achieved economically by the development intervention? How big is the efficiency or utilization ratio of the resources used (Comparison: resources applied – results)?

Impact

Does the development intervention contribute to reaching higher level development objectives (preferably, overall objective)? What is the impact or effect of the intervention in proportion to the overall

Sustainability

Are the positive effects or impacts sustainable? How is the sustainability or permanence of the intervention and its effects to be assessed?

Since there are no international standards for reviews available, the principles and standards for evaluations need are applied accordingly.

Sr. No.	Project	Relevance	Efficiency	Effectiveness	Uniqueness	Impact	Sustainability
1	Construction of Stage Building to Koti Chennaya Jodukare Kambala Samithi, Ontikatte, Moodabidri	H	H	H	H	H	M
2	Construction of UKG & LKG School building for Government Aided, Shree Boodeshwara Swamy English Medium School Building, Hassan, Karnataka.	H	H	M	M	H	H
3	Construction of Building for Swadhar Graha Rehabilitation cum Vocation Skill Training Centre for Women and Girls (Prajna Counselling)	H	H	M	H	H	H
4	Construction of Research Centre on Cow Breeding and Products at Siddapura	H	H	H	H	H	H

CHAPTER 5: CONCLUSION

In reviewing the various construction projects undertaken—namely, the Stage for Koti Chennayya Kambala at Moodabidre, the LKG/UKG English Medium School building for Boodeshwara school, Hassan, the Building for Women Rehabilitation and vocational skill training for the Prajna Counseling Centre, Mudipu, and the Research Centre on Cow Breeding and products at Siddapura—it is evident that each initiative addresses critical community needs. Together, these projects not only enhance local infrastructure but also promote social development, education, and welfare.

The development of infrastructure projects in India is crucial for addressing various socio-economic challenges. Projects focusing on cultural, educational, social, and agricultural needs not only promote community welfare but also contribute significantly to national development objectives. The report is the output of the impact assessment of four specific projects undertaken by MRPL: the construction of a cultural stage, an English medium school, a women's rehabilitation center, and a cow breeding center. Each project is examined for its relevance, potential gaps, and alignment with sustainable development goals (SDGs) and national policies. However, to maximize their impact and ensure long-term viability, strategic planning and collaboration across stakeholders are essential.

Final Thoughts

By addressing the strategic recommendations, MRPL can significantly enhance the effectiveness and sustainability of its initiatives. The proactive engagement of the community, investment in capacity building, and alignment with national and global frameworks will not only elevate the impact of individual projects but also contribute to the overarching goal of fostering resilient and thriving communities across India. Implementing these recommendations will position MRPL as a leader in community development, driving meaningful change and setting a precedent for future initiatives.
