PREFACE

This report presents an independent impact assessment of the Corporate Social Responsibility (CSR) initiatives implemented by Mangalore Refinery and Petrochemicals Limited (MRPL) during the financial year 2023-24 across its operational locations in India. The assessment has been conducted by Crux Management Services Pvt. Ltd. as an external evaluation partner.

The report provides a structured overview of MRPL's CSR policy framework, budgetary allocations, and strategic focus areas. It is organized into comprehensive sections detailing the assessment approach and methodology adopted by Crux, followed by rigorous analysis of key components, evaluation findings, and outcome-level insights, culminating in evidence-based recommendations.

The assessment has been executed by a multidisciplinary team of subject matter experts from Crux under the leadership of the Project Head. The findings presented herein are grounded in robust quantitative and qualitative data collected across all projects. A systematic stakeholder consultation process has been undertaken to ensure that the perspectives of beneficiaries, implementing partners, and other relevant stakeholders are adequately captured and reflected in the analysis.

The recommendations outlined in this report are strategic and action-oriented, aligned with the identified thematic priorities. These are intended to support MRPL in strengthening the effectiveness, scalability, and sustainability of its CSR interventions, and to inform future program design and decision-making.

ACKNOWLEDGEMENTS

Crux Management Services Pvt. Ltd. acknowledges the valuable guidance and support extended by Mr. B. Prashnatha Baliga, CGM (Admin), and Mr. K. Malakonda Rao, Chief Manager – CSR, Mangalore Refinery and Petrochemicals Limited (MRPL), throughout the course of this impact assessment.

The assessment process involved extensive consultations and field-level interactions with beneficiaries across multiple project locations in India. We sincerely appreciate the cooperation and facilitation provided by the MRPL CSR team and project site personnel, whose insights and on-ground support were instrumental in enabling a comprehensive and rigorous evaluation.

We also extend our gratitude to all stakeholders, including implementing partners and community members, for their time, openness, and constructive inputs, which have significantly enriched the quality and depth of this assessment.

This study has been successfully completed through the collective efforts and collaboration of all involved.

Ms. Hema Jain
CEO, Crux Management Services Pvt. Ltd.

ACRONYMS

Abbreviation	Full Form
CSR	Corporate Social Responsibility
MRPL	Mangalore Refinery and Petrochemicals Limited
PSU	Public Sector Unit
DPE	Department of Public Enterprises
NGO	Non-Governmental Organization
BPL	Below Poverty Line
MoU	Memorandum of Understanding
SDG	Sustainable Development Goals

Chapter 1

Executive Summary

Corporate Social Responsibility (CSR) represents a progressive business philosophy that extends beyond profit maximization to encompass ethical conduct, social accountability, and environmental stewardship. The formalization of CSR in India through the Companies Act, 2013, marked a significant milestone, institutionalizing the role of businesses in contributing to inclusive and sustainable development.

At its core, CSR is grounded in the principle that organizations must balance economic objectives with their responsibilities toward society and the environment. It emphasizes the importance of stakeholder engagement and the well-being of all constituents while pursuing business growth. This includes addressing the expectations of a diverse set of stakeholders such as employees, customers, communities, regulators, and the environment.

In the contemporary business landscape, organizations increasingly recognize that effective stakeholder management is critical to achieving sustained and meaningful growth. CSR frameworks encourage businesses to proactively engage with stakeholders and integrate their needs into strategic and operational decision-making processes.

The global emphasis on sustainability, particularly through the United Nations Sustainable Development Goals (SDGs), has further reinforced the importance of responsible business practices. CSR initiatives today are closely aligned with sustainability principles, promoting efforts to reduce environmental impact, optimize resource utilization, and contribute to long-term ecological balance.

CSR may be defined as the alignment of business operations with societal values. It involves embedding stakeholder interests into corporate policies and actions, ensuring that organizations operate in an ethical and responsible manner. This includes treating stakeholders, both internal and external, in a way that is consistent with accepted social norms and standards. The broader objective of CSR is to enhance the quality of life while maintaining corporate profitability and long-term viability.

The concept of the Triple Bottom Line, encompassing economic, social, and environmental dimensions, is inherent within CSR. It underscores the need for organizations to view environmental considerations as integral to their stakeholder ecosystem. Increasingly, the term "corporate responsibility" is also used to reflect this holistic approach.

CSR investments are widely regarded as strategic social investments. By contributing to areas such as community development, education, healthcare, and social welfare, organizations not only generate positive societal outcomes but also strengthen their long-term reputation, risk resilience, and business sustainability.

The evolution and expansion of CSR in recent years have been driven by several key factors:

Globalization: Increasing interconnectedness has heightened awareness of global social, economic, and environmental challenges, encouraging businesses to adopt responsible practices.

Regulatory Environment: Governments across the world, including India, have introduced frameworks that mandate or promote CSR, making compliance an integral part of corporate governance.

Investor Considerations: Environmental, Social, and Governance (ESG) factors are increasingly influencing investment decisions, with responsible businesses gaining greater investor confidence.

Consumer Awareness: Evolving consumer preferences favour organizations that demonstrate ethical, socially responsible, and environmentally sustainable practices.

Technology and Transparency: Advances in technology have enhanced transparency, enabling stakeholders to access information easily and hold organizations accountable for their actions.

In conclusion, CSR reflects an evolved understanding of the role of businesses in society. It represents a strategic approach that integrates social impact with business objectives, contributing to risk mitigation, stakeholder trust, and long-term value creation. As stakeholder expectations continue to evolve, CSR is expected to remain a critical component of corporate strategy, driving sustainable and inclusive growth.

IMPORTANCE OF CSR IMPACT ASSESSMENT

Corporate Social Responsibility (CSR) refers to the ethical commitment of organizations to contribute to societal well-being and environmental sustainability while conducting business operations. In this context, CSR impact assessment serves as a structured and systematic process to evaluate the outcomes and effectiveness of CSR interventions. It enables organizations to assess whether their initiatives are delivering intended results, generating measurable impact, and creating long-term value for stakeholders.

A robust impact assessment framework facilitates evidence-based decision-making, enhances transparency, and supports the continuous refinement of CSR strategies. It further ensures alignment between organizational objectives, stakeholder expectations, and broader developmental priorities at national and global levels.

IMPORTANCE OF CSR IMPACT ASSESSMENT

CSR impact assessment plays a critical role in strengthening the design, delivery, and accountability of CSR initiatives:

- **Effectiveness Measurement:** Enables organizations to evaluate whether CSR interventions are achieving defined objectives and contributing to meaningful change.
- **Stakeholder Engagement:** Ensures inclusion of diverse stakeholder perspectives, thereby enhancing the relevance and responsiveness of CSR programs.
- **Continuous Improvement:** Provides actionable insights into performance, facilitating adaptive management and long-term program enhancement.
- **Alignment with Global Frameworks:** Supports alignment with internationally recognized frameworks such as the United Nations Sustainable Development Goals (SDGs).
- **Reputation and Credibility:** Strengthens transparency and accountability, thereby enhancing stakeholder trust and corporate reputation.

REESI MODEL FOR CSR IMPACT ASSESSMENT

The REESI Model, comprising Relevance, Efficiency, Effectiveness, Sustainability, and Impact, offers a comprehensive framework for evaluating CSR initiatives:

- **Relevance:** Assesses the extent to which CSR initiatives align with community needs, stakeholder expectations, and organizational priorities.
- **Efficiency:** Evaluates the optimal utilization of resources, including financial, human, and operational inputs, in delivering outputs.
- **Effectiveness:** Measures the degree to which intended objectives and outcomes have been achieved.
- **Sustainability:** Examines the long-term viability and continuity of project outcomes beyond the period of direct intervention.
- **Impact:** Assesses the broader social, economic, and environmental changes resulting from CSR initiatives, both tangible and intangible.

This framework ensures a holistic evaluation, enabling organizations to derive meaningful insights into both performance and long-term value creation.

THEORY OF CHANGE APPROACH

Complementing the REESI framework, the Theory of Change (ToC) approach provides a structured methodology to understand how and why desired changes are expected to occur through CSR interventions.

The Theory of Change establishes a logical pathway linking inputs, activities, outputs, outcomes, and long-term impact. It articulates the underlying assumptions and contextual factors influencing program success, thereby strengthening the design and evaluation of CSR initiatives.

Key elements of the Theory of Change include:

- **Inputs:** Resources invested, including financial, human, and institutional capacities.
- **Activities:** Actions and interventions implemented under CSR programs.
- **Outputs:** Immediate deliverables resulting from activities.
- **Outcomes:** Short- to medium-term changes experienced by beneficiaries.
- **Impact:** Long-term, sustained improvements in socio-economic and environmental conditions.

The integration of Theory of Change within CSR impact assessment enhances analytical rigor, supports outcome-based evaluation, and ensures a clear linkage between program design and intended impact.

SUSTAINABLE DEVELOPMENT GOALS (SDGs)

The Sustainable Development Goals (SDGs), established by the United Nations in 2015, comprise 17 global objectives aimed at addressing critical challenges such as poverty, inequality, climate change, and environmental sustainability by 2030.

Relevance of SDGs to CSR

- **Global Alignment:** Provides a universally accepted framework to guide CSR strategies.
- **Accountability:** Enables organizations to track and report contributions to global development priorities.
- **Collaboration:** Facilitates partnerships with governments, civil society, and development agencies.
- **Long-Term Orientation:** Encourages a shift from short-term interventions to sustainable development outcomes.
- **Impact Measurement:** Strengthens the ability to measure and communicate social and environmental impact.

Organizations can align CSR initiatives with SDGs by identifying relevant goals, setting measurable targets, implementing focused interventions, and monitoring progress systematically.

CSR REGULATORY FRAMEWORK IN INDIA

The Companies Act, 2013, represents a landmark regulation that institutionalized CSR in India. Key provisions include:

- **Applicability:** Mandatory for companies meeting specified financial thresholds (net worth, turnover, or profitability).
- **Prescribed Spending:** Requirement to allocate a minimum of 2% of average net profits toward CSR activities.
- **Governance:** Establishment of a CSR Committee of the Board to oversee policy formulation and implementation.
- **Disclosure:** Mandatory reporting of CSR activities and expenditures in annual reports.
- **Focus on Impact:** Increasing emphasis on outcome measurement and transparent disclosure of impact.

In addition, the Department of Public Enterprises (DPE) has issued guidelines for Central Public Sector Enterprises (CPSEs), promoting a shift from philanthropic approaches to strategic, research-driven, and participatory CSR.

EVOLVING APPROACH TO CSR

CSR has evolved from a philanthropic obligation to a strategic business function. The contemporary approach emphasizes:

- Evidence-based program design aligned with community needs
- Stakeholder participation and inclusive development
- Sustainability and long-term impact orientation
- Measurable outcomes and accountability

This transition reflects an increasing recognition of CSR as a driver of both social value creation and organizational sustainability.

CSR impact assessment is integral to ensuring that corporate interventions deliver measurable, meaningful, and sustainable outcomes. Frameworks such as the REESI Model and Theory of Change provide structured methodologies for evaluating performance and strengthening program effectiveness.

Aligned with global standards such as the SDGs and supported by regulatory frameworks like the Companies Act, 2013, CSR has emerged as a critical component of responsible business practice. It enables organizations to contribute proactively to societal development while reinforcing long-term business resilience and stakeholder trust.

CRUX Research Initiatives

Crux Management Services P Ltd has a clear mandate and vision to provide comprehensive services in the CSR space. The organization undertakes various activities, including capacity building, mindset transformation, empowerment of women and children, health awareness campaigns, and preventive measures.

Crux partners with public and private sector organizations to deliver impactful CSR solutions. Crux services include conducting baseline surveys, CSR planning, CSR audits, and impact assessments. These initiatives are designed to ensure meaningful community development and sustainable outcomes.

Mangalore Refinery and Petrochemicals Limited (MRPL)

Mangalore Refinery and Petrochemicals Limited (MRPL) is a Miniratna Schedule A Central Public Sector Enterprise (CPSE) under the Ministry of Petroleum & Natural Gas. MRPL operates a state-of-the-art 15.0 MMTPA refinery located in Mangaluru, Karnataka, offering versatile designs for processing diverse crude oils and delivering high-quality petroleum products.

MRPL's refinery produces a wide range of products, including:

- Naphtha LPG
- Motor Spirit
- High-Speed Diesel
- Kerosene
- Aviation Turbine Fuel
- Sulphur, Xylene, Bitumen, Pet Coke, and Polypropylene

The facility also includes a 440 KTA Novolen gas-phase Polypropylene Plant, which produces a complete range of homopolymer grades.

MRPL operates an Aromatic Complex in the Mangalore Special Economic Zone (MSEZ), producing Para Xylene and Benzene.

Marketing and Infrastructure

The company has infrastructure assets, including two captive jetties, a single-point mooring facility, and rail wagon loading silos for Pet Coke. MRPL also manages depots in Kasargod (Kerala), Hindupur (Andhra Pradesh), and Hosur (Tamil Nadu) to strengthen its marketing and distribution network. The company has a 50:50 joint venture with Shell Gas B.V. called Shell MRPL Aviation Fuels and Services Limited, which markets aviation turbine fuel (ATF) to domestic and international airlines. Shell MRPL Aviation Fuels and Services Limited sources ATF from MRPL's refinery complex and supplies it to various airports, including Bengaluru, Goa, Hyderabad, Chennai, and Mangalore.

MRPL's commitment to innovation and excellence has made it a leader in the hydrocarbon downstream sector, setting benchmarks in quality and operational efficiency.

MRPL CSR Policy Preamble

Mangalore Refinery & Petrochemicals Limited (MRPL) is a Miniratna Schedule A CPSE and a subsidiary of Oil & Natural Gas Corporation Limited (ONGC). Under the CSR brand name "Samrakshan," MRPL has consistently delivered initiatives promoting sustainable and equitable development. The CSR policy is aligned with Schedule VII, Section 135 of the Companies Act, 2013, CSR Policy Rules, 2014, and Department of Public Enterprises (DPE) guidelines.

Objectives of the CSR Policy

- **Strengthened Commitment:** Foster commitment at all levels to operate in an economically, socially, and environmentally sustainable manner.
- **Community Welfare:** Undertake programs that enhance the quality of life and economic well-being of local communities, especially focusing on weaker sections.
- **Positive Image:** Generate goodwill for MRPL through its CSR initiatives and reinforce its image as a socially responsible corporate entity.

Focus Areas of CSR

Shiksha Samrakshan

- Activities promoting education, particularly in Anganwadi centers, government, and aided schools.
- Infrastructure support for classrooms, toilets, science labs, and sports facilities.
- Skill development and vocational training for unemployed youth and underprivileged groups.

Arogya Samrakshan

- Providing primary healthcare services in rural and urban areas.
- Organizing medical camps and health awareness campaigns.
- Offering infrastructural support to government hospitals and medical equipment.
- Providing clean and safe drinking water facilities in schools and Anganwadi Centres.

Bahujana Samrakshan

- Infrastructure support for building community halls.
- Women empowerment projects, including girl child development and gender-sensitive initiatives.
- Programs for physically and mentally challenged individuals.
- Disaster preparedness and capacity-building activities.

Prakriti Samrakshan

- Support for clean drinking water and sanitation projects in rural areas.
- Groundwater recharge and water management initiatives.
- Environmental awareness programs in schools and villages.

Sanskriti Samrakshan

- Preservation of local historical monuments and cultural heritage sites.
- Promotion of artisans, craftspeople, musicians, and other traditional art forms.

Geographical Spread

Allocation of funds will be in the ratio of 60% in local area, 30% in other parts of Karnataka, and 10% in other States in India. Company can take up those districts in Karnataka on priority in which it has operations such as retail outlets, depots, terminals, and other establishments to be considered as local area.

Area within some suitable radius around which the operations exist can also be considered as local area.

Chapter 2

Methodology

Research Design

A research design is a plan, structure, and strategy of investigation so conceived as to obtain answers to research questions or problems. The plan is the complete scheme or program of the research. It includes an outline of what the investigator will do from writing the hypotheses and their operational implications to the final analysis of data.

Descriptive study designs can help you show whether your program is operating as planned, provide you with feedback about the services you offer, determine whether your program is producing the types of outputs and outcomes you want, and help clarify program processes, goals, and objectives. This is an ideal design for an evaluation study where the context is known to the researcher and the research questions need further description to evaluate the program.

Thus, a descriptive study design was used with quantitative method to collect information from the beneficiaries and qualitative method to gain insights into the workings of the implementing partners and MRPL officials. The quantitative descriptive design is concerned with describing the characteristics of a particular group, with description of certain facts concerning that group.

Quantitative method was used as is normally done in a descriptive study design. This helped best to establish the incidence, extent, and magnitude of the program. There was an attempt to seek information about the program to evaluate its planning, implementation, and outcomes. There was no attempt to theorize the data to explain the phenomena. Findings are generalized based on the response of the sample.

Research Questions

The questions are a guiding beacon for a research study and the reason to find answers. These questions further help to define the objectives of the study.

- What were the objectives of the program?
- Were the objectives in line with the needs assessed in the baseline survey?
- What were the intended outcomes?
- Have the outcomes been met in the implementation?
- What are the benefits to the target population?
- What is the extent of effectiveness of implementation of the program?
- The possible areas of correction/improvement.

The analysis and design followed the basic essence of midterm impact assessment on the aspects:

Relevance

- Did the overall goal match the needs of the project area?
- Did the project's baseline data correctly address the needs of the area?

Efficiency

- What outputs were achieved and whether they were according to the plan? Was the implementation schedule as planned?
- Was the project cost within planned limit? Was the fund utilization prudent?

Effectiveness & Uniqueness

- Did the outputs help achieve the goal? Did the project have any unique feature?
- Comparing the inputs to the extent of goals achieved, can project implementation be considered to be effective?

Impact

- What were the various tangible and intangible impacts?
- Positive and negative impacts (socio-economic, environment, policy, technology, awareness) on different stakeholders of the project?

Sustainability

- Would the impacts created by the project sustain?
- Considering the present course of the project, is the project sustainable?
- If not, what modifications and corrections need to be done with project execution methodology?

Research Objectives

- To assess if project objectives were in line with the desired output.
- To evaluate if benefits reached the target population.
- To assess the effectiveness of the program in terms of the changes.

Data Collection

Data collection is a vital part of research to bring the facts and validate them. The present study was conducted for multiple projects across different geographies and thematic areas of CSR programs, so there were separate methods and tools used to collect information from different stakeholders of all the programs.

Objectives	Sources	Tools
To assess if project objectives were in line with the needs of baseline survey	MRPL Implementing agency	Secondary data like project proposal and MoU with partners Interview schedule with MRPL Interview schedule with implementing agency
To evaluate if benefits reached the target population	Beneficiaries Site visit (for infrastructure)	Questionnaires for beneficiaries Observation notes of researcher
To assess the effectiveness of the program in terms of the changes	Beneficiaries Implementing agency MRPL	Questionnaires for beneficiaries Interview schedule with MRPL Interview schedule with implementing agency Observation notes of researcher

Sources of Data

The research team focused and collected only primary data from the field. They had interviews with the beneficiaries and got their views to understand the impact of the program. To get a more holistic view, they interviewed the implementing agencies to understand the implementation, strengths, and challenges. Questionnaires consisting mainly of close-ended questions focused on the information and experiences of the beneficiaries of various program services were prepared respectively. Interview schedule for the officials of implementing agencies was prepared, which comprised open-ended questions.

Sampling Criteria

Sampling is simply stated as selecting a portion of the population in the research area, which will be a representation of the whole population. The usual goal in sampling is to produce a representative sample, that is, a sample that is similar to the population on all characteristics, except that it includes fewer people because it is a sample rather than the complete population. Simple random sampling was used in order to select the samples. A simple random sample is meant to be an unbiased representation of a group. It is the most basic sampling procedure to draw the sample.

Total Projects Evaluated in the Report**CSR Projects Completed During 2023-24**

Sl. No.	Project	Thematic Area	Area / Location	Budget Allotted Rs in Lakhs	Thrust Areas
1	Construction of Indoor Stadium at Gonikoppal High School Ground, Kodagu District	Shiksha Samrakshan	Kodagu, Karnataka	50	Education, Health and Fitness
2	Construction of Community Hall in Hoovinahadagalli, Bellary District	Bahujan Samrakshan	Bellary, Karnataka	323	Community development
3	Development of Public Park near Karkala Taluk Office, Karkala, Udupi District	Prakruthi Samrakshan	Karkala, Udupi, Karnataka	140.96	Environment and Health

Chapter 3

Demographic Profile

Demographics

- The geographical location of the projects is all rural areas of Karnataka.
- All the beneficiaries are from the rural areas of Kodagu, Bellary, and Udupi within the state of Karnataka.
- The age group of beneficiaries includes young children, teenagers, adolescents, elderly persons, and also certain projects have students and women beneficiaries of various age groups as well.
- The beneficiaries are from low-income profile. Both males and females have accrued the benefits from all the projects.
- The beneficiaries are from all communities including the SC/ST communities, Adivasis, and others.

General and Socio-Economic Demographic for the Projects

The three projects are located in different districts of **Karnataka, Kodagu, Bellary, and Udupi**, covering a mix of **rural, semi-urban, and peri-urban populations**. Collectively, the projects cater to a diverse demographic base, including **students, youth, women, elderly individuals, and the general public** across multiple socio-economic backgrounds.

From a demographic perspective, the beneficiary population includes:

- **School-going children and youth**, particularly in rural and semi-urban areas, with a need for improved educational and recreational infrastructure.
- **Economically weaker sections**, especially in Bellary district, where a significant proportion of the population belongs to SC/ST communities, indicating social vulnerability and the need for inclusive development interventions.
- **General public across all age groups**, including working adults and elderly citizens, particularly in Karkala, where community and lifestyle infrastructure supports a broader population base.

In terms of socio-economic status, the regions reflect a mix of:

- **Lower- and middle-income households**, especially in rural Kodagu and Bellary, where livelihoods are often dependent on agriculture, plantations, or informal labor.
- **Limited access to quality infrastructure**, including sports facilities, community spaces, and recreational areas, particularly in interior and underserved locations.
- **Moderate to relatively better socio-economic indicators** in Udupi district, including higher literacy rates and awareness of health, fitness, and environmental sustainability.

Socially, the projects address key developmental gaps such as:

- Educational support and youth development (indoor stadium for students)
- Social inclusion and community empowerment (community hall for SC/ST and rural populations)
- Health, well-being, and environmental sustainability (public park for all age groups)

Overall, the combined demographic profile reflects a balanced mix of vulnerable and general populations, with interventions designed to promote inclusive growth, improved quality of life, social equity, and community well-being.

1. Construction of Indoor Stadium – Gonikoppal High School, Kodagu District

The project is located in **Kodagu district**, a predominantly rural and semi-urban region of Karnataka known for its dispersed population and plantation-based economy. The primary beneficiaries are approximately **1,200 school students**, representing children and adolescents from nearby villages and small towns. The demographic profile largely includes **youth from middle- and lower-income households**, with limited access to modern sports infrastructure. The student population is likely diverse in terms of socio-economic backgrounds, with a mix of communities typical of rural Kodagu.

The project directly addresses the needs of **school-going youth, focusing on improving physical health, reducing dropout rates, and increasing school attendance**. It also indirectly benefits families and the local community by promoting education and holistic development. Gender inclusion is significant, as indoor facilities encourage equal participation of both boys and girls in sports.

2. Construction of Community Hall – Hoovinahadagalli, Bellary District

This project serves the **general public of Hoovinahadagalli in Bellary district**, a region characterized by rural settlements and economically weaker sections. A key demographic feature is that around **65% of the population belongs to SC/ST communities**, indicating a strong presence of historically marginalized groups.

The beneficiaries include people across all age groups, including **youth, women, elderly individuals, and unskilled workers**. The area likely has lower literacy levels and limited access to community infrastructure, making such a facility crucial for social and developmental activities.

The community hall supports diverse demographic needs:

- **Youth and unemployed individuals** (skill development programs)
- **Women and children** (health camps and awareness programs)
- **Illiterate adults** (night schooling)
- **Entire community** (social gatherings and government outreach programs)

Overall, the project targets **social inclusion, empowerment, and capacity building** of underprivileged populations.

3. Development of Public Park – Karkala, Udupi District

The project is situated in **Karkala taluk of Udupi district**, a semi-urban region with relatively higher literacy rate and better socio-economic indicators compared to interior districts. The park is expected to **benefit around 40,000 people**, covering a broad and diverse demographic.

The beneficiaries include:

- **Children and youth** (play and recreational activities)
- **Working adults** (fitness and stress relief)
- **Elderly population** (walking and relaxation spaces)
- **Women and families** (safe public recreational area)

The demographic spread includes **urban and peri-urban residents**, with varying income levels but generally better awareness of health and lifestyle. The project promotes community well-being, environmental consciousness, and healthy living habits.

This initiative caters to all age groups and social segments, making it highly inclusive and enhancing overall quality of life in the region.

Chapter 4

Programs and the Implementing Agencies

The CSR projects of MRPL are being implemented since 2015. It is imperative that a final assessment is made to take stock of the implementation progress and key achievements, key processes instituted with respect to results indicators, key issues faced with respect to progress, scaling-up and quality, and any changes/corrective measures and restructuring that would be required for accelerating implementation and scaling-up, improved project outcomes, and utilization of funds.

Project Details - Thematic Areas and SDG Alignment

Sl. No.	Project	Thematic Area	Area / Location	Budget Allotted Rs in Lakhs	Thrust Areas	SDG Alignment	Beneficiaries	Year Started	Project Completion Date	Implementing Partner
1	Construction of Indoor Stadium of Gonikoppal High School Ground, Kodagu District	Shiksha Samrakshan	Kodagu, Karnataka	50	Education, Health and Fitness	SDG 4, SDG 3	1200	27.01.2020	14.03.2024	Primary & Secondary Education Society (R), Gonikoppal, Virajpet Taluk, Kodagu
2	Construction of Community Hall in Hoovinahadagalli, Bellary District	Bahujan Samrakshan	Bellary, Karnataka	323	Community development	SDG 11, SDG 10	3000	03.12.2019	27.03.2024	Kittur Rani Chennamma Panchamasali Trust (R), Huvinahadagalli, Bellary
3	Development of Public Park near Karkala Taluk Office, Karkala, Udupi District	Prakruthi Samrakshan	Karkala, Udupi, Karnataka	140.96	Environment and Health	SDG 11, SDG 3	2500	29.11.2018	20.03.2024	Taluk Panchayath, Karkala

The Project Wise Analysis is as follows:

I. Construction of Indoor Stadium – Gonikoppal High School, Kodagu District

Project Overview

- **Project Cost:** ₹50 Lakhs
- **Location:** Kodagu District, Karnataka
- **Beneficiaries:** Approximately 1,200 students
- **Start Year:** 27 January 2020
- **End Year:** 14 March 2024
- **Implementing Partner:** Primary & Secondary Education Society (R), Gonikoppal, Virajpet Taluk, Kodagu

Scope of Work

The project involved the construction of a multi-purpose indoor stadium within the premises of Gonikoppal High School. The facility was designed to support various indoor sports such as badminton, table tennis, basketball, and volleyball, thereby enabling year-round sports activities irrespective of weather conditions.

About the Project and Location

Gonikoppal High School is a well-established educational institution in Kodagu district with a student strength of over 1,200 and a legacy marked by its Golden Jubilee celebration in 2015. The region experiences high rainfall, which significantly restricts outdoor sports activities for a large part of the year. In this context, the project was conceptualized to address the lack of indoor sports infrastructure and to promote holistic development through improved access to physical education and recreational facilities.

Assessment

Theory of Change Findings

The project is based on the assumption that providing access to quality sports infrastructure will enhance student participation in physical activities, which in turn will improve physical health, discipline, and overall engagement in school. The assessment by Crux and the findings indicate that the indoor stadium has led to increased participation in sports and extracurricular activities. The team, during discussion, collected information from all stakeholders that the project contributed to improved attendance, reduced absenteeism, and enhanced student motivation and engagement.

Clear changes have been observed in student participation, discipline, and engagement. Beneficiaries expect further improvements through structured coaching. The core problem of lack of sports infrastructure has been largely solved.

The facility has also created a sense of pride and ownership within the community, encouraging greater participation in school events and fostering social interaction. Additionally, it has provided a safe and inclusive space for youth engagement, reducing idle time and contributing positively to their overall development.

Assessment – REESI Model

Awareness & Access: HIGH

Awareness of the indoor stadium is universal among students and staff, as it is located within the school premises. Beneficiaries reported that they came to know about the facility through school authorities and daily usage. The facility is used frequently as part of physical education and extracurricular activities. Accessibility is high, as it is located within the campus and available to all students without barriers.

Relevance: HIGH

The proposed construction of an indoor stadium at Gonikoppal High School Ground in Kodagu District is well aligned with the local developmental priorities of promoting youth engagement, sports infrastructure, and community well-being. Kodagu, known for its strong sporting culture, especially in badminton, has a growing need for all-weather sports facilities to support students and local talent throughout the year. This project addresses the gap in accessible indoor infrastructure, enabling uninterrupted training and hosting of events regardless of climatic conditions, which is particularly important in a region with heavy monsoon seasons.

Beneficiaries confirmed that the project addresses a critical need, particularly the lack of sports infrastructure during monsoon seasons. The facility has solved the problem of disrupted physical activities due to weather conditions. While formal consultation is not widely recalled, the need for such infrastructure was strongly felt by the school community.

Effectiveness: HIGH

Satisfaction levels are high, with students and teachers reporting that the quality of the facility is good and suitable for multiple sports. The project has significantly increased participation in sports. Suggested improvements mainly include provision of professional coaching and additional equipment, indicating that the core infrastructure is effective.

The availability of an all-weather indoor space is especially valued in Kodagu's high rainfall conditions, ensuring uninterrupted sports and recreational activities throughout the year.

Efficiency: HIGH

Feedback on project timelines is mixed, with some respondents indicating delays while others were unaware of timelines. No major issues regarding construction quality were reported. The outcome is satisfactory, but the extended duration affects efficiency perception.

The project encountered challenges such as unpredictable weather conditions in Kodagu district, logistical difficulties in material transportation, and coordination among multiple stakeholders, especially during COVID. Additionally, maintaining quality standards within budget constraints and adhering to timelines required continuous monitoring and adaptive planning.

Sustainability: HIGH

The facility is well maintained by the school management. Beneficiaries expressed confidence that it will continue to benefit students in the future. As an institutional asset, sustainability is strong with routine upkeep.

Impact: MEDIUM

Students reported improved physical activity, better engagement, and increased attendance. However, the impact is largely limited to school-level benefits, with scope to expand through structured programs and competitions. Quality of life improvement is reported as "Somewhat to Yes."

Economic Benefit

The project provides indirect economic benefits through improved health outcomes, which may reduce healthcare-related expenses in the long term. Enhanced school infrastructure may also contribute to increased enrollment and institutional growth. Additionally, the facility can potentially support local events that generate economic activity.

Assessment of Branding

The branding visibility for the indoor stadium project is observed to be good. Basic project identification through signage or acknowledgment of CSR support is present within the school premises.

Given that the facility is primarily used within the school ecosystem, the branding reach is restricted to students, staff, and visitors. There is limited evidence of structured branding elements such as prominent display boards, plaques with project details, or communication materials highlighting the CSR contribution and its objectives.

Overall, while the branding ensures basic recognition, there is scope for enhancement through improved visibility, standardized signage, and integration of branding with school events, competitions, and community outreach activities to increase awareness of the initiative.

Community Development

The project contributes to community development by promoting sports and physical fitness among students. It encourages constructive engagement of youth and has the potential to serve as a hub for local sports activities and events.

Success Story

Story 1: From Irregular Attendance to Active Participation – Ramesh (Class 9 Student)

Ramesh, a Class 9 student at Gonikoppal High School, had irregular attendance, especially during the monsoon season when outdoor activities were suspended. With limited engagement in school beyond academics, he often lacked motivation to attend regularly.

After the construction of the indoor stadium, Ramesh began participating in badminton and volleyball. The availability of a structured, all-weather sports facility encouraged him to attend school regularly. Over time, his attendance improved significantly, and he became an active participant in school sports activities.

The project has not only improved his physical fitness but also boosted his confidence and interest in school, demonstrating how access to sports infrastructure can positively influence student behavior and engagement.

Story 2: Building Confidence through Sports – Asha (Class 10 Student)

Asha, a Class 10 student, was previously not involved in any sports activities due to lack of facilities and opportunities. She was shy and hesitant to participate in group activities.

With the introduction of the indoor stadium, Asha started playing table tennis during physical education sessions. Over time, she gained confidence and began participating in inter-school competitions. Her teachers observed a noticeable improvement in her communication skills and self-confidence.

The indoor stadium provided her with a safe and supportive environment to explore her potential, contributing to her overall personal development.

Gaps Identified

The assessment identified certain gaps, including the absence of structured sports training programs and limited access to professional coaching. There is no clearly defined maintenance plan or dedicated budget for upkeep. The facility is also underutilized beyond school hours, indicating scope for improved community engagement.

SDG Mapping in Brief

The project aligns with SDG 4 (Quality Education) by supporting holistic development through sports and SDG 3 (Good Health and Well-being) by promoting physical activity and healthier lifestyles among students.

Recommendations

To enhance the functionality and user comfort of the proposed indoor stadium at Gonikoppal High School Ground, after inspection, it is recommended to provide a protective roof extension near the two-door entrance to safeguard against heavy rain.

Essential support facilities such as a dedicated green room for users, well-maintained washrooms, and access to clean drinking water should be incorporated. Additionally, installing security cameras will ensure safety, monitoring, and proper management of the premises.

It is recommended to introduce structured sports training programs with qualified coaches to enhance student performance. A dedicated maintenance plan and budget should be established to ensure long-term sustainability. The school may be advised to explore opportunities to utilize the facility for community engagement and inter-school competitions.

II. Construction of Community Hall – Hoovinahadagalli, Bellary District

Project Overview

- **Project Cost:** ₹323 Lakhs
- **Location:** Hoovinahadagalli, Bellary District, Karnataka
- **Beneficiaries:** Approximately 3,000 community members
- **Start Year:** 03 December 2019
- **End Year:** 27 March 2024
- **Implementing Partner:** Kittur Rani Chennamma Panchamasali Trust (R), Hoovinahadagalli, Bellary

Scope of Work

The project involved the construction of a community hall (Samudaya Bhavana) to serve as a multi-purpose facility for the local population. The infrastructure was designed to support various activities including skill development programs, medical camps, night schooling for illiterate individuals, public meetings, awareness programs, and government-led initiatives.

About the Project and Location

Hoovinahadagalli in Bellary district is a semi-rural area with a significant proportion of economically and socially disadvantaged populations, with approximately 65% belonging to SC/ST communities. The absence of a dedicated common space for community activities was a key developmental gap. The project was initiated based on a request from the Kittur Rani Chennamma Panchamasali Trust to address this need. The community hall has been established as a shared public asset aimed at supporting social, educational, and developmental activities, aligning with rural development priorities under Schedule VII of the Companies Act, 2013, and the Bahujan Samrakshan thematic focus.

Assessment

Theory of Change Findings

The project is based on the premise that access to a common community infrastructure will facilitate social inclusion, improve access to developmental programs, and enhance community participation. The availability of the community hall is expected to enable skill-building initiatives, awareness programs, and access to essential services, thereby contributing to socio-economic upliftment.

Assessment findings during the team visits indicate that the facility has created a central platform for community engagement. It has improved access to social and developmental activities, particularly benefiting marginalized groups. The infrastructure supports increased participation in community programs and strengthens social cohesion.

The project has partially achieved its intended outcomes. While it has created a platform for community engagement, the lack of regular programming limits its full impact. Beneficiaries expect improved outcomes with more structured activities.

Awareness & Access: HIGH

Awareness of the community hall is high among local residents, primarily through word-of-mouth and community networks. The facility is accessible to most community members. However, frequency of use varies, with usage being occasional and event-based rather than regular.

Relevance: HIGH

Beneficiaries strongly acknowledged that the project addresses an important need, particularly the lack of a common space for community activities. It has helped solve issues related to conducting meetings, social functions, and welfare programs. Awareness of community consultation is mixed.

Effectiveness: MEDIUM

Satisfaction levels are moderate. While the quality of construction is considered good, the effectiveness is limited by irregular usage. Beneficiaries suggested increasing the frequency of skill development programs, awareness sessions, and community activities.

Efficiency: HIGH

There are no major issues reported regarding project execution. The scale of infrastructure created relative to the community served indicates efficient use of resources. Respondents did not highlight significant delays or operational concerns.

Sustainability: MEDIUM

Maintenance is currently being managed but lacks a formal structure. Responsibility for upkeep is not clearly defined, raising concerns about long-term sustainability. Beneficiaries believe the facility will continue to be useful, but maintenance systems need strengthening.

Impact: MEDIUM

The project has improved access to community services and enabled social and welfare activities. However, the impact is moderate due to limited frequency of use. Quality of life improvement is reported as "Somewhat."

Economic Impact: MEDIUM

Some indirect economic benefits are observed through skill development programs and access to welfare schemes. However, consistent income or employment generation is limited. Economic impact is present but not strong.

Assessment of Branding

The branding for the community hall project is visible but not optimally leveraged. The facility, being a public asset, offers strong potential for branding visibility; however, current branding is primarily limited to basic identification at the site.

The project benefits from higher public interface due to its usage for community gatherings, events, and development programs. Despite this, structured branding elements such as detailed display boards, information panels, or consistent CSR messaging are either limited or not prominently showcased.

Given the scale of beneficiaries and community engagement, the branding potential remains underutilized. Strengthening branding through permanent signage, event-based visibility, and integration with government or community programs can significantly enhance recognition and visibility of the CSR contribution.

Success Story

Success Story 1: Access to Skill Development – Shankar (Youth Beneficiary)

Shankar, a young resident of Hoovinahadagalli from an SC community, had limited access to skill development opportunities due to lack of infrastructure in the village. He was engaged in irregular daily wage work with minimal prospects for skill enhancement.

After the construction of the community hall, skill development sessions and awareness programs began to be organized at the facility. Shankar attended a training program conducted in the hall, which helped him acquire new vocational skills.

As a result, he was able to secure more stable employment and improve his income. The availability of the community hall created opportunities that were previously inaccessible, contributing directly to his economic upliftment.

Success Story 2: Improved Access to Healthcare – Lakshmi (Local Resident)

Lakshmi, a middle-aged woman from the village, previously had limited access to healthcare services due to distance and lack of organized medical camps in the area.

With the establishment of the community hall, medical camps began to be conducted periodically within the village. Lakshmi attended one such health camp where she received timely medical consultation and guidance for her health condition.

This access to local healthcare services reduced her dependency on distant facilities and improved her health awareness. The community hall has thus played a crucial role in bringing essential services closer to residents like her.

Success Story 3: Creating a Community Interaction Hub

The community hall has evolved into a social hub where people from different age groups and backgrounds come together. Earlier, there were limited spaces for community interaction and leisure.

With the creation of the community hall, families, children, and senior citizens now have a safe and welcoming space to spend time together. community hall has become a venue for informal gatherings, social interaction, and recreational activities, fostering a stronger sense of community.

This transformation has enhanced the quality of life in the area and strengthened community bonds.

- **Community Development**

- The project has significantly contributed to community development by providing a common platform for social interaction and developmental activities. It promotes inclusivity and empowers marginalized sections by enabling access to education, awareness programs, and public services.

- **Economic Benefit**

- The project provides indirect economic benefits by facilitating skill development programs, which can improve livelihood opportunities. It also supports access to government schemes and services, contributing to the socio-economic upliftment of the community.

- **Gaps Identified**

- Certain gaps identified include the need for more structured and regular programming within the facility. There is limited evidence of institutionalized skill development or training initiatives. Additionally, a formal maintenance and operational framework is not clearly defined, and utilization can be further optimized.

SDG Mapping in Brief

The project aligns with SDG 11 (Sustainable Cities and Communities) by creating inclusive community infrastructure and SDG 10 (Reduced Inequalities) by supporting marginalized populations and promoting social inclusion.

Recommendations

It is recommended to institutionalize regular skill development and capacity-building programs within the community hall. A formal management and maintenance committee should be established to ensure sustainability. Partnerships with government departments and NGOs can be explored to increase program delivery. Awareness programs, health camps, and educational initiatives should be conducted regularly to maximize impact.

Beneficiary Interaction

Interactions with beneficiaries indicate that the community hall is valued as an important shared space. Community members, especially from SC/ST groups, expressed that the facility has improved access to social and developmental activities. There is a demand for more frequent skill development programs, educational initiatives, and health-related services.

The Snapshot of Findings is as follows:

The project has successfully created essential community infrastructure that addresses a critical gap in the region. It has enhanced social inclusion and provided a platform for developmental activities, particularly benefiting marginalized populations. The project aligns well with CSR objectives and SDGs. While the facility is functional and beneficial, there is scope to strengthen its impact through structured programming, improved management, and enhanced utilization. Overall, the project represents a significant step towards community empowerment and rural development.

o

III. Development of Public Park – Near Karkala Taluk Office, Udupi District

Project Overview

- **Project Cost:** ₹140.96 Lakhs
- **Location:** Karkala Taluk, Udupi District, Karnataka
- **Beneficiaries:** Approximately 2,500 direct users (with a wider reach of approximately 40,000 population in and around the taluk)
- **Start Year:** 29 November 2018
- **End Year:** 20 March 2024
- **Implementing Partner:** Taluk Panchayath, Karkala

Scope of Work

The project involved the development of a public park near the Karkala Taluk Office, including landscaping, walking pathways, seating arrangements, and facilities to support physical exercise and recreational activities. The park was designed as a green public space to promote environmental sustainability, health, and community well-being.

About the Project and Location

Karkala, located in Udupi district, is a growing town with increasing need for public recreational infrastructure. Prior to the intervention, there was limited access to organized green spaces for community use. The project was conceptualized to create an accessible and inclusive public space catering to people of all age groups for walking, relaxation, and physical fitness activities. The initiative aligns with environmental sustainability objectives under Schedule VII of the Companies Act, 2013, and falls under the Prakruthi Samrakshan thematic area.

Assessment

Theory of Change Findings

The project is based on the premise that the creation of accessible green public spaces promotes physical activity, enhances mental well-being, and improves overall quality of life. The assessment indicates that the park has provided a dedicated space for recreation, exercise, and social interaction, leading to increased community engagement and improved health awareness among users.

The project has successfully delivered intended outcomes. Increased physical activity, improved well-being, and community engagement are clearly observed. Beneficiaries expect further improvements through additional facilities and programs.

The public park development is well aligned with local community priorities, including accessible recreational spaces, environmental sustainability, and safety. The design incorporates inputs from residents, such as walking tracks, green landscaping, and inclusive play areas for all age groups. Overall, the project reflects the needs and expectations of the local population while supporting long-term urban development goals.

Assessment – REESI Model

Awareness & Access: HIGH

Awareness of the park is very high due to its public location and visibility. Beneficiaries reported learning about it through direct observation and community use. The park is frequently used, particularly for walking and exercise, and is easily accessible.

Relevance: HIGH

The community perceives the public park as highly useful for recreation, relaxation, and social interaction. Residents expressed satisfaction with the amenities provided, such as walking paths, seating areas, and green spaces. Overall, the park is viewed as a valuable asset that enhances quality of life and promotes community well-being.

The project addresses a key need for public recreational space. Beneficiaries confirmed that it has solved the problem of lack of safe and accessible green spaces. Consultation awareness is limited, but need recognition is strong.

Effectiveness: HIGH

Satisfaction levels are high, with users appreciating the quality and usability of the park. It effectively supports physical activity and recreation. Suggested improvements include additional amenities and organized activities.

Efficiency: HIGH

No major concerns regarding timelines or execution were reported. The park is well-developed and serves a large population, indicating efficient use of resources.

Sustainability: MEDIUM

Maintenance is ongoing but requires consistent attention. Beneficiaries highlighted the need for better upkeep, cleanliness, and security. Sustainability depends on continuous management by local authorities.

Impact: HIGH

The project has significantly improved access to recreational space and promoted healthier lifestyles. Beneficiaries reported clear improvements in physical activity and well-being. Quality of life improvement is reported as "Yes."

Impact on Utilization

The park is actively utilized by the community, particularly during mornings and evenings. It serves as a common space for physical activities and social interaction. There is potential to further enhance utilization through organized wellness programs and community events.

Community Development

The project has contributed to community development by providing an inclusive space that promotes social interaction, physical activity, and environmental awareness. It enhances the quality of life and fosters a sense of community ownership.

Economic Benefit

While direct economic benefits are limited, the project generates indirect value by improving public health, reducing lifestyle-related health risks, and enhancing the attractiveness of the locality. It may also contribute to increased footfall and local economic activity in surrounding areas.

The Branding

The branding for the public park project has high visibility potential due to its open and public nature. The park is frequented by a large number of users across different age groups, providing a strong platform for CSR visibility.

While basic acknowledgment of support may be present, there is limited evidence of prominent and engaging branding elements such as well-designed entrance signage, informational boards, or awareness displays linking the project to environmental sustainability and public health.

Considering the continuous public footfall, the project offers significant opportunity for impactful branding. Enhanced branding through aesthetically designed boards, integration with environmental awareness messaging, and visibility at key entry and activity points can substantially improve outreach and public recognition.

Gaps Identified

The assessment identified gaps such as the absence of structured recreational or fitness programs within the park. There is also a need for a clearly defined maintenance and management framework to ensure long-term upkeep. Additional amenities such as lighting, security, and organized activities could further enhance user experience.

SDG Mapping in Brief

The project aligns with SDG 11 (Sustainable Cities and Communities) by creating inclusive and sustainable public spaces, and SDG 3 (Good Health and Well-being) by promoting physical activity and mental well-being.

Beneficiary Interaction

Feedback from beneficiaries indicates that the park is widely appreciated as a valuable addition to the locality. Users across age groups reported regular use for walking, exercise, and relaxation. The community expressed satisfaction with the availability of a clean and accessible green space, while also highlighting the need for more organized activities and improved maintenance.

Recommendations

The inspection recommends installing a drinking RO water purification system, providing a roof cover for the children's play area, and adding additional exercise equipment to enhance user comfort and utility.

Furthermore, increasing green cover and establishing a permanent garden water supply system are advised to ensure better environmental sustainability and maintenance.

It is recommended to introduce structured wellness programs such as yoga sessions, fitness camps, and community events to enhance utilization. A dedicated maintenance plan with defined responsibilities should be established. Additional facilities such as improved lighting, security measures, and seating arrangements can further improve user experience. Collaboration with local organizations can help in organizing regular activities and ensuring sustained engagement.

The Snapshot of Findings is as follows:

The project has successfully created a much-needed public recreational space, contributing to environmental sustainability and community well-being. It has improved access to green infrastructure and encouraged healthier lifestyles among the population. The project aligns strongly with CSR objectives and SDGs. While utilization is good, there is scope to enhance impact through structured programming, improved maintenance, and additional amenities. Overall, the project represents a significant contribution to sustainable urban development and public health.

Success Story 1: Promoting Health and Active Lifestyles

Before the development of the public park, residents of Karkala had limited access to organized green spaces for walking and exercise. This restricted opportunities for maintaining an active lifestyle, particularly among elderly citizens and working individuals.

The development of the park has transformed the area into a vibrant space for physical activity. Residents now regularly use the park for morning walks, jogging, yoga, and relaxation. The availability of a clean and accessible environment has encouraged people of all age groups to adopt healthier routines.

This has contributed to increased health awareness and improved overall well-being within the community.

Success Story 2: Creating a Community Interaction Hub

The public park has evolved into a social hub where people from different age groups and backgrounds come together. Earlier, there were limited spaces for community interaction and leisure. With the creation of the park, families, children, and senior citizens now have a safe and welcoming space to spend time together. The park has become a venue for informal gatherings, social interaction, and recreational activities, fostering a stronger sense of community.

This transformation has enhanced the quality of life in the area and strengthened community bonds.

Success Story 3: Improved Health and Lifestyle – Raghavendra (Senior Citizen)

Raghavendra, a senior citizen residing near Karkala Taluk Office, previously had limited options for safe and accessible spaces for walking and exercise. His sedentary lifestyle had begun to affect his health.

After the development of the public park, he started visiting the park regularly for morning walks. The availability of a clean, well-maintained environment motivated him to adopt a daily fitness routine. Over time, he experienced improvements in his physical health and overall well-being. The park has become an integral part of his daily life, enabling him to lead a more active and healthier lifestyle.

Success Story 4: Safe Recreational Space for Children – Nandini (School Student)

Nandini, a young student living in Karkala, previously had limited safe spaces for outdoor play. Most available areas were either unsafe or not suitable for children.

With the development of the public park, she now has access to a secure and well-maintained space for recreation. She regularly visits the park with her family, engaging in outdoor activities and social interaction with other children.

This has improved her physical activity levels and social development. The park has provided children like Nandini with a safe environment for recreation, contributing to their overall growth and well-being.

THE PROJECT ANALYSIS ON THE 5 PARAMETER OF CSR MODEL

Parameters Considered

- Relevance
- Efficiency
- Effectiveness & Uniqueness
- Impact
- Sustainability

Evaluations have the following characteristics:

The five evaluation criteria of Relevance, Effectiveness, Efficiency, Impact, and Sustainability are covered. Cross-cutting issues, such as poverty, gender, and environment, are taken into consideration, and the intervention logic is analyzed.

Parameter	Description
Relevance	Are we doing the right thing? How important is the relevance or significance of the intervention regarding local and national requirements and priorities?
Effectiveness	Are the objectives of the development interventions being achieved? How big is the effectiveness or impact of the project compared to the objectives planned (Comparison: result – planning)?
Efficiency	Are the objectives being achieved economically by the development intervention? How big is the efficiency or utilization ratio of the resources used (Comparison: resources applied – results)?
Impact	Does the development intervention contribute to reaching higher level development objectives (preferably, overall objective)? What is the impact or effect of the intervention in proportion to the overall?
Sustainability	Are the positive effects or impacts sustainable? How is the sustainability or permanence of the intervention and its effects to be assessed?

Since there are no international standards for reviews available, the principles and standards for evaluations need are applied accordingly.

Project Details - Thematic Areas, SDG Alignment and Impact Assessment on REESI Model

Project	Thematic Area as per CSR Policy	Location	Thrust Areas	SDG Alignment	Relevance	Efficiency	Effectiveness	Uniqueness	Impact	Sustainability
Construction of Indoor Stadium of Gonikoppal High School Ground	Shiksha Samrakshan	Kodagu, Karnataka	Education, Health and Fitness	SDG 4, SDG 3	High	High	High	High	Medium	High
Construction of Community Hall in Hoovinahadagalli, Bellary District	Bahujan Samrakshan	Bellary, Karnataka	Community Development	SDG 11, SDG 10	High	High	Medium	High	Medium	Medium
Development of Public Park near Karkala Taluk Office, Karkala, Udupi District	Prakruthi Samrakshan	Karkala, Udupi, Karnataka	Environment and Health	SDG 11, SDG 3	High	High	High	High	High	Medium

Chapter 5

Conclusion and Recommendation

The assessment of the three CSR projects, **Indoor Stadium (Kodagu), Community Hall (Bellary), and Public Park (Karkala)**, demonstrates that the interventions have been largely successful in addressing critical infrastructure gaps and aligning with local developmental priorities. Each project has created tangible community assets that contribute to improved quality of life, enhanced social engagement, and increased access to essential facilities. Collectively, these initiatives reflect a strong commitment to community development and responsible CSR implementation.

From a relevance perspective, all three projects are highly aligned with the needs of their respective beneficiaries. **The indoor stadium addresses climatic constraints affecting student sports activities, the community hall fulfills the need for a shared social infrastructure in a semi-rural setting, and the public park responds to the growing demand for accessible green spaces.** This strong contextual alignment has ensured acceptance and ownership among beneficiaries.

In terms of effectiveness and efficiency, **the projects have delivered quality infrastructure with satisfactory utilization levels, particularly in the case of the indoor stadium and public park.** The community hall, while effective in design and intent, currently operates below its full potential due to limited programmatic use. Overall, resources have been utilized efficiently, and outputs are consistent with planned objectives, despite minor delays and contextual challenges such as weather and pandemic-related disruptions.

The impact of these projects is evident in improved physical activity, community interaction, and access to services. The indoor stadium has positively influenced student attendance and engagement, the community hall has enhanced social inclusion and access to welfare activities, and the public park has contributed to healthier lifestyles and environmental value. However, the depth of impact varies, with greater outcomes observed where utilization is regular and structured.

A key cross-cutting concern is sustainability, which, while currently adequate, is not yet fully institutionalized. Maintenance systems, operational frameworks, and long-term programming strategies require strengthening across all projects to ensure that the benefits are sustained and scaled over time.

Strategic Recommendations

1. Shift from Infrastructure-Led to Program-Led Interventions

While infrastructure creation has been successful, the next phase should focus on activating these assets through structured programs. Introducing regular sports coaching in the indoor stadium, skill development and awareness programs in the community hall, and wellness and recreational activities in the public park will significantly enhance utilization and outcomes.

2. Establish Robust Management and Maintenance Frameworks

Each facility should be supported by a clearly defined governance structure, including designated management committees, allocated maintenance budgets, and standard operating procedures. This will ensure accountability, consistent upkeep, and long-term sustainability.

3. Strengthen Institutional Partnerships and Convergence

Collaborations with local government bodies, educational institutions, NGOs, and service providers can help deliver continuous programming and expand outreach. Such partnerships will also enable better integration with existing schemes and development initiatives.

4. Enhance Monitoring, Evaluation, and Learning Systems

Implementing structured monitoring mechanisms, such as tracking usage, participation rates, and outcome indicators, will support evidence-based decision-making. Periodic evaluations can help refine strategies and improve future CSR interventions.

5. Improve Utilization through Community Engagement

Efforts should be made to extend the use of these facilities beyond their primary user groups. For example, opening the indoor stadium and community hall for broader community use and organizing events in the public park can significantly increase social impact.

6. Strengthen Branding and Visibility

Current branding efforts are largely basic. There is an opportunity to adopt a more strategic approach by installing standardized signage, integrating CSR messaging into events, and linking branding with thematic areas such as health, education, and sustainability. This will enhance stakeholder awareness and reinforce the organization's CSR identity.

In conclusion, the projects represent well-conceived and effectively executed CSR interventions that have delivered meaningful benefits to communities. The infrastructure created serves as a strong foundation for long-term development impact. However, to fully realize their potential, there is a need to transition towards programmatic engagement, structured management, and sustained community involvement.

By adopting the above recommendations, the implementing organization can significantly enhance the depth, scale, and sustainability of its CSR outcomes, positioning itself as a model for impactful and forward-looking community development initiatives.
